Discover a Resource to Grow Your Leadership Capacity

Become the school leader your students need.

This is a book about the promise and possibilities of development and its relationship to growing as justice-centered leaders.

Today, as more and more schools are folding social justice into their strategic visions—or, alternatively, crafting “anti-woke” policies to deliberately limit or even prevent vital discussions of race, racism, gender identity, sexual orientation, history, and current events—it seems more clear than ever that people’s understandings of justice are deeply influenced by the positions they inhabit on earth (i.e., geographic, temporal, cultural, racial, economic, developmental, intersectional). The stakes also remain incredibly high. The highest, really, as they concern children’s lives.

So what does it mean to center justice as an educational leader amid all of this urgency and complexity? By “justice-centering educational leadership,” we mean leadership that holds justice (along multiple dimensions) as central to—and inseparable from—the work of caring for, joining, championing, and guiding any group, team, faculty, school, district, or organization.
