Consider approval of the District Reunification Annex

1. Background
   Texas Education Code (TEC 37.108) and Board Policy CKC (LEGAL) state that each school district shall adopt and implement a Multi-Hazard Emergency Operations Plan (MHEOP) for use in the District's facilities. The District Reunification Annex serves as a functional document to the MHEOP. It establishes specific actions and protocols for the District to provide for a safe and orderly reunification of students with their parents or legal guardians. An effective Reunification Annex ensures that the District has established procedures, designated reunification locations, and appropriate personnel and resources to facilitate the safe release of students while maintaining accountability and ensuring the safety of students and staff.

2. Process
   The Southwest ISD Safety and Security Committee (SSC) reviewed the District Reunification Annex to ensure that reunification procedures align with district emergency response protocols. A major goal for the committee was to ensure that the District's reunification procedures support an efficient, safe and organized release of students during an emergency event.

3. Fiscal Impact
   None.

4. Recommendation
   That the Board approve the District Reunification Annex as presented for review.

5. Required
   Board action.
