"This book changed the lives of hundreds of my students. Early in my career, I gained a mentor who introduced me to You Can Handle Them All and I still have his copy of the book, now much worn and well-used. I will never part with it. I am now on a research team that publishes strength-focused accounts of youth. We are trying to help folks working with youth develop their "professional x-ray vision" (that is from the late Dr. Gary Phillips, also a profound influence on my practice) in the manner You Can Handle Them All does. I taught in public schools for 31 years. Now I am in my second year of teaching future teachers at a university. I tell each student that the first resource in their library should be You Can Handle Them All. So, thank you so much for helping me, my students, and future teachers along this journey. When I think of you, I think of the impact you've had on so many lives. Thank you." Mary-Lynn Wardle, MA Sessional Instructor and University Consultant.
