MHS School Board Report
November 2026

Attendance

Attendance is hovering around 89% for our students. Most of this is due to the three activities happening currently. However, there has been a sickness going through the school

Our current enrollment is at 90 students

Issues Within the High School

Things are continuing to migrate to the regular business of school. I feel like there has been a strong start to the second quarter. We have had an increase in tardies as the days get shorter. We also have had many students traveling for school activities that can make it hard to attend on off weeks.

I will be out to get some medical things taken care of after Thanksgiving and the first week of December. I will be in town for Christmas break and present for the Clark Cochrane Tournament.

Celebrations-

Our Admin team took a look at a very exciting CTE based curriculum. This also contains components of Nursing, Financial Literacy, Career Exploration, and many other components.This program will allow for education to continue through travel and absences.

All of our programs continue to see growth in participation in all activities. We still have a very high level of engagement in the activities that we offer.

Welding has been developing students that can weld at a functional level.
