

Stewartville Public Works

Public Works Bi-Weekly Council Report
11-5-2026 thru 11-18-2026

- We continue to wrestle through the leaf pickup program. We have had numerous complaints about us going around piles of garden plants, grass clippings, sticks, and the fact that we have been so slow to get around the town. The week of steady rain and the fact that people are putting grass clippings in the curb line have really slowed the process down. We will continue to go around those piles as it plugs our vac and leaves a mess behind. This is for picking up leaves and leaves only unless we are told otherwise.

- The new pavilion at the frisbee golf is almost complete. We will concrete it in the spring along with the playground border by the SYAA playground.

- We have ramped up the water meter installs again with a second crew and will be adding a 3rd crew in the next couple of weeks.

- Legacy Dr. has been blacktopped. The are working on grading and dirt work to finish up.

- Most of the holiday decorations were put up this week to beat the bad weather. We have a few yet to put up and will be decorating City Hall interior on the day before Thanksgiving.

- Still working on buckthorn as well.

- We have proposed a plan for what we are thinking about usages with the Ottjes property to assist with future development plans. We will share that with you all.

- Been working on 2027 budgeting and fees to get the budget wrapped up.

Thank you and please let us know of any concerns or questions.
