The ANT Q9 is an Access Control System that individually measures the body temperature of employees entering facilities. This Smart Access Control terminal combines infrared temperature measurement with 3-in-1 facial recognition. Intelligent analysis has mask detection capabilities and records date, time, body temperature and other details.

Access Control System

ANT-FR-Q9

- Dimensions: 4.7 x 8.9 x 1.3 inches
- Recognition time: 0.2s
- Precise measurement
- Facial mask recognition system
- Stores the data of entry to the facilities
- Non-contact temperature measurement: 32x32 temperature detection module
- Temperature detection distance: Up to 1.2m
- Detection accuracy of 0.3 C
- Integrates with access lock systems and more

Give your customers the peace of mind they need to resume business with you, knowing they are being protected by all means available.
