

## **Board Report for September 14, 2015**

### **Maintenance:**

We are very busy. I am trying to fix the stadium lights at the football field. I have been trying to do work orders early in the morning or after school till 7:00pm. Janet has finally been released to full duty and she is trying to get caught up with mowing and weed eating. I have been fixing some locks too. I have been working on air conditioners at the campuses as they give problems. I've been trying to knock off as many work orders as I can. We have been doing our best.

### **Transportation:**

I'm trying to fix the A/C on the VanHool . Also, I hope to start working on BB-2 to get it up and running again. I have had a few bus problems here and there, but I have been able to fix it and send it on down the road. I did have a bus get stuck on route one morning and had to pull them out. I'm working really hard to keep everything rolling.
