

School Board Meeting:

April 22, 2024

Subject:

Annual Radon Testing

Presenter:

**Tim Helppi,
Director of Buildings and Grounds**

SUGGESTED SCHOOL BOARD ACTION:

No Board Action Required

DESCRIPTION:

Each year, the district conducts radon testing at some sites within the district with the help of our Health and Safety Consultant. The results of the testing are shared with the School Board per the Minnesota Department of Health guidelines.

This year's testing was conducted at the Buffalo Community Middle School and Discovery Elementary School. Those test results show that the buildings did not have radon levels that would require additional action on the part of the district to mitigate.

Each district site is tested every 5 years on a rotating schedule.

Please don't hesitate to reach out if you have questions or if you would like additional information.
