

Dashboards and Trends:

Using Epidemiology for the First 5 Population in Riverside County
September 10, 2025

RUHS Public Health- Epidemiology & Program Evaluation Branch (EPE)

The **Data Unit** is home to a multi-disciplinary team of epidemiologists, research specialists, economists and data scientists.

- Mission: investigate the factors that determine the presence or absence of diseases and health related outcomes
- Analyze data, prepare reports and presentations, and use statistics and Geographic Information System (GIS) to guide program and policy development
- Access and experience with a variety of special data sources
 - *Births & deaths data (Vital Records), hospital and emergency department data, 911 data, vaccinations, and demographic data*

Dashboards in Development

- General Demographics Dashboard
 - Population, births, deaths, top causes of injury/death, poverty status, etc.

| Grade Level | Cumulative | Homeless Student Enrollment | Temporarily | Temporary Shelters | Hotels/Motels | Temporarily | Missing/Unknown |
| | Enrollment | | Doubled-Up | | | Unsheltered | Dwelling Type |
| Grade TK | 11,581 | 675 | 91.10% | 3.60% | 4.10% | 1.20% | 0.00% |
| Grade K | 27,959 | 1,728 | 89.10% | 4.20% | 5.20% | 1.50% | 0.00% |
| Grade 1 | 30,592 | 1,408 | 85.90% | 4.70% | 7.30% | 2.10% | 0.00% |

Prenatal Care

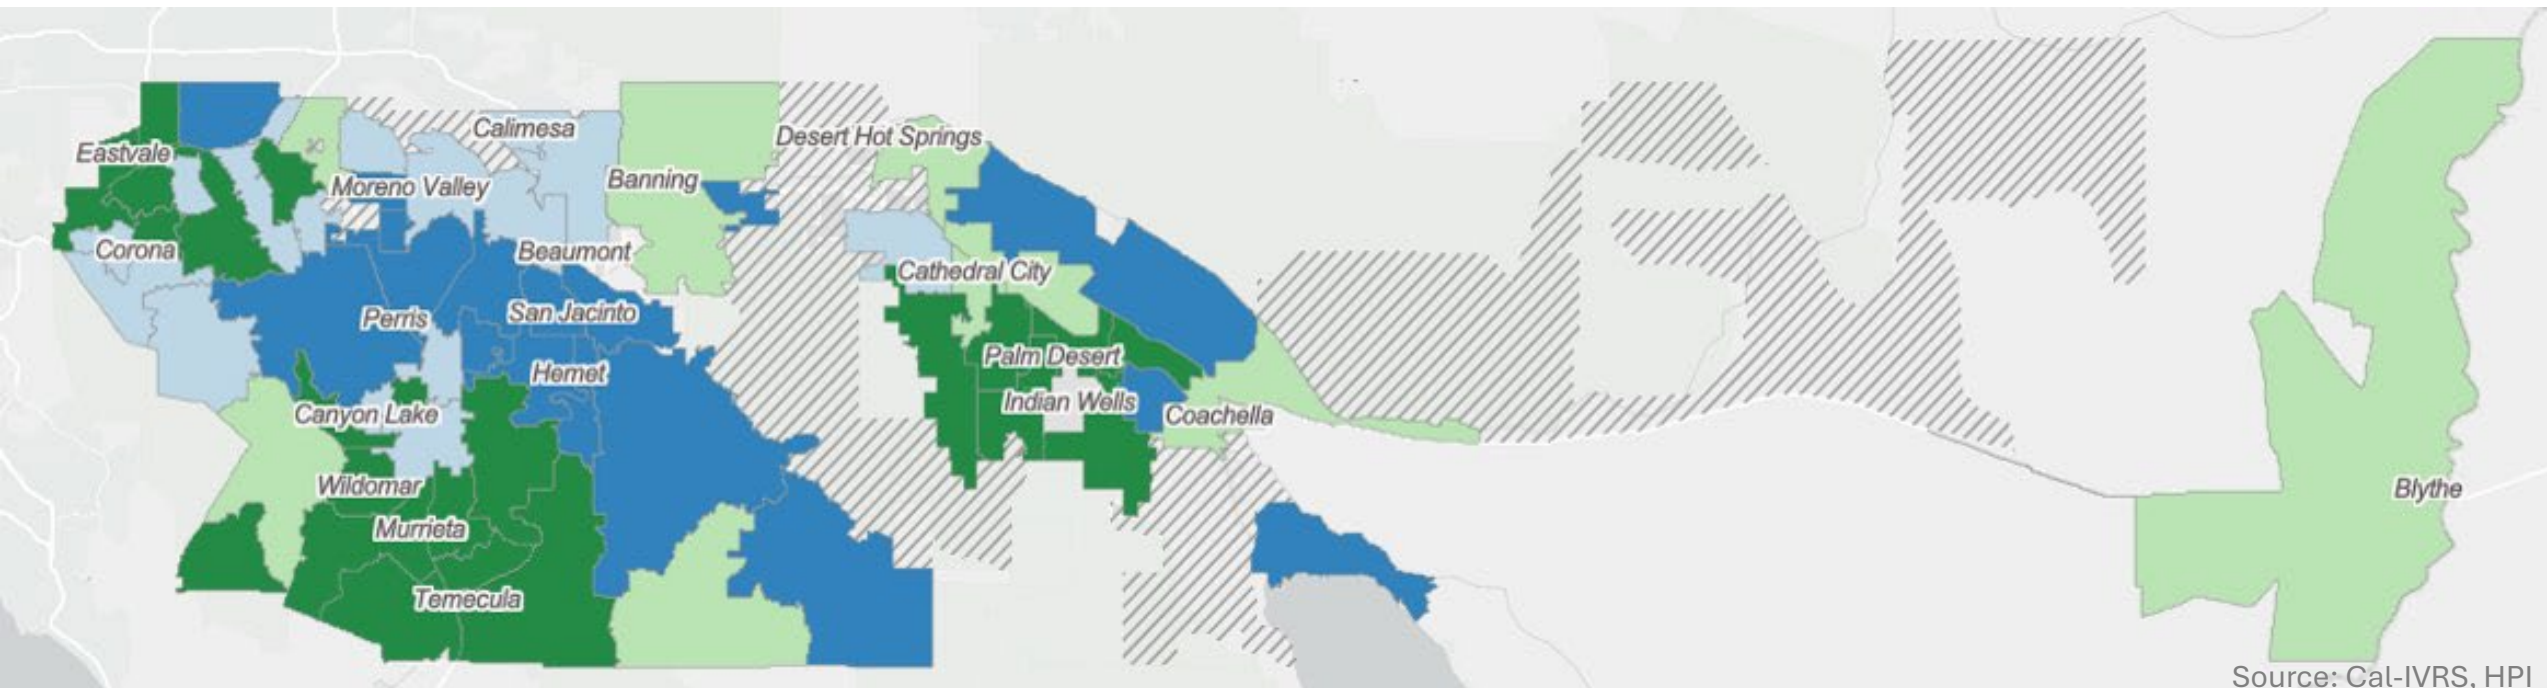

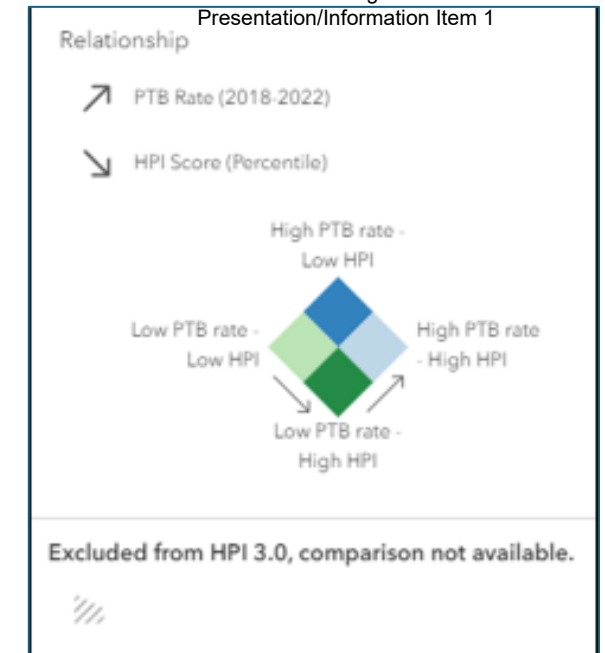

Percent of No Prenatal and Inadequate* Prenatal Care by PGB's Race/Ethnicity in Riverside County
(2018-2023)

*Inadequate prenatal care: care that began after the 4th month of pregnancy, as well as prenatal care that included less than 50% of the recommended number of visits

Preterm Birth Rate (PTB) & Healthy Places Index (HPI)

- About 9% of births in Riverside County are preterm
- Period of Measure: 2018-2022, by zip code
- Preterm Birth Rate per 1,000 people
- HPI 3.0 score of social conditions that influence health outcomes

Home Visiting in Riverside County

- Voluntary, evidence-based support for parents through home visits and tele-visits.
- Coaches families on child development, health, and navigating daily challenges
- **Funding streams across county partners:**
 - *F5RC: CalWORKs Home Visiting Program + Prop 10 investments to expand access and sustain services.*
 - *RUHS-PH: Federal MIECHV + California Home Visiting Program (state general fund).*
 - *DPSS: FFPSA/Prevention funds supporting SafeCare model*
- Shared dashboards will provide countywide system level data on reach, retention, and equity of access – guiding future investments, service areas, and performance improvement.

Home Visiting: County-wide Reach

7,000+ home visits delivered in FY 24/25

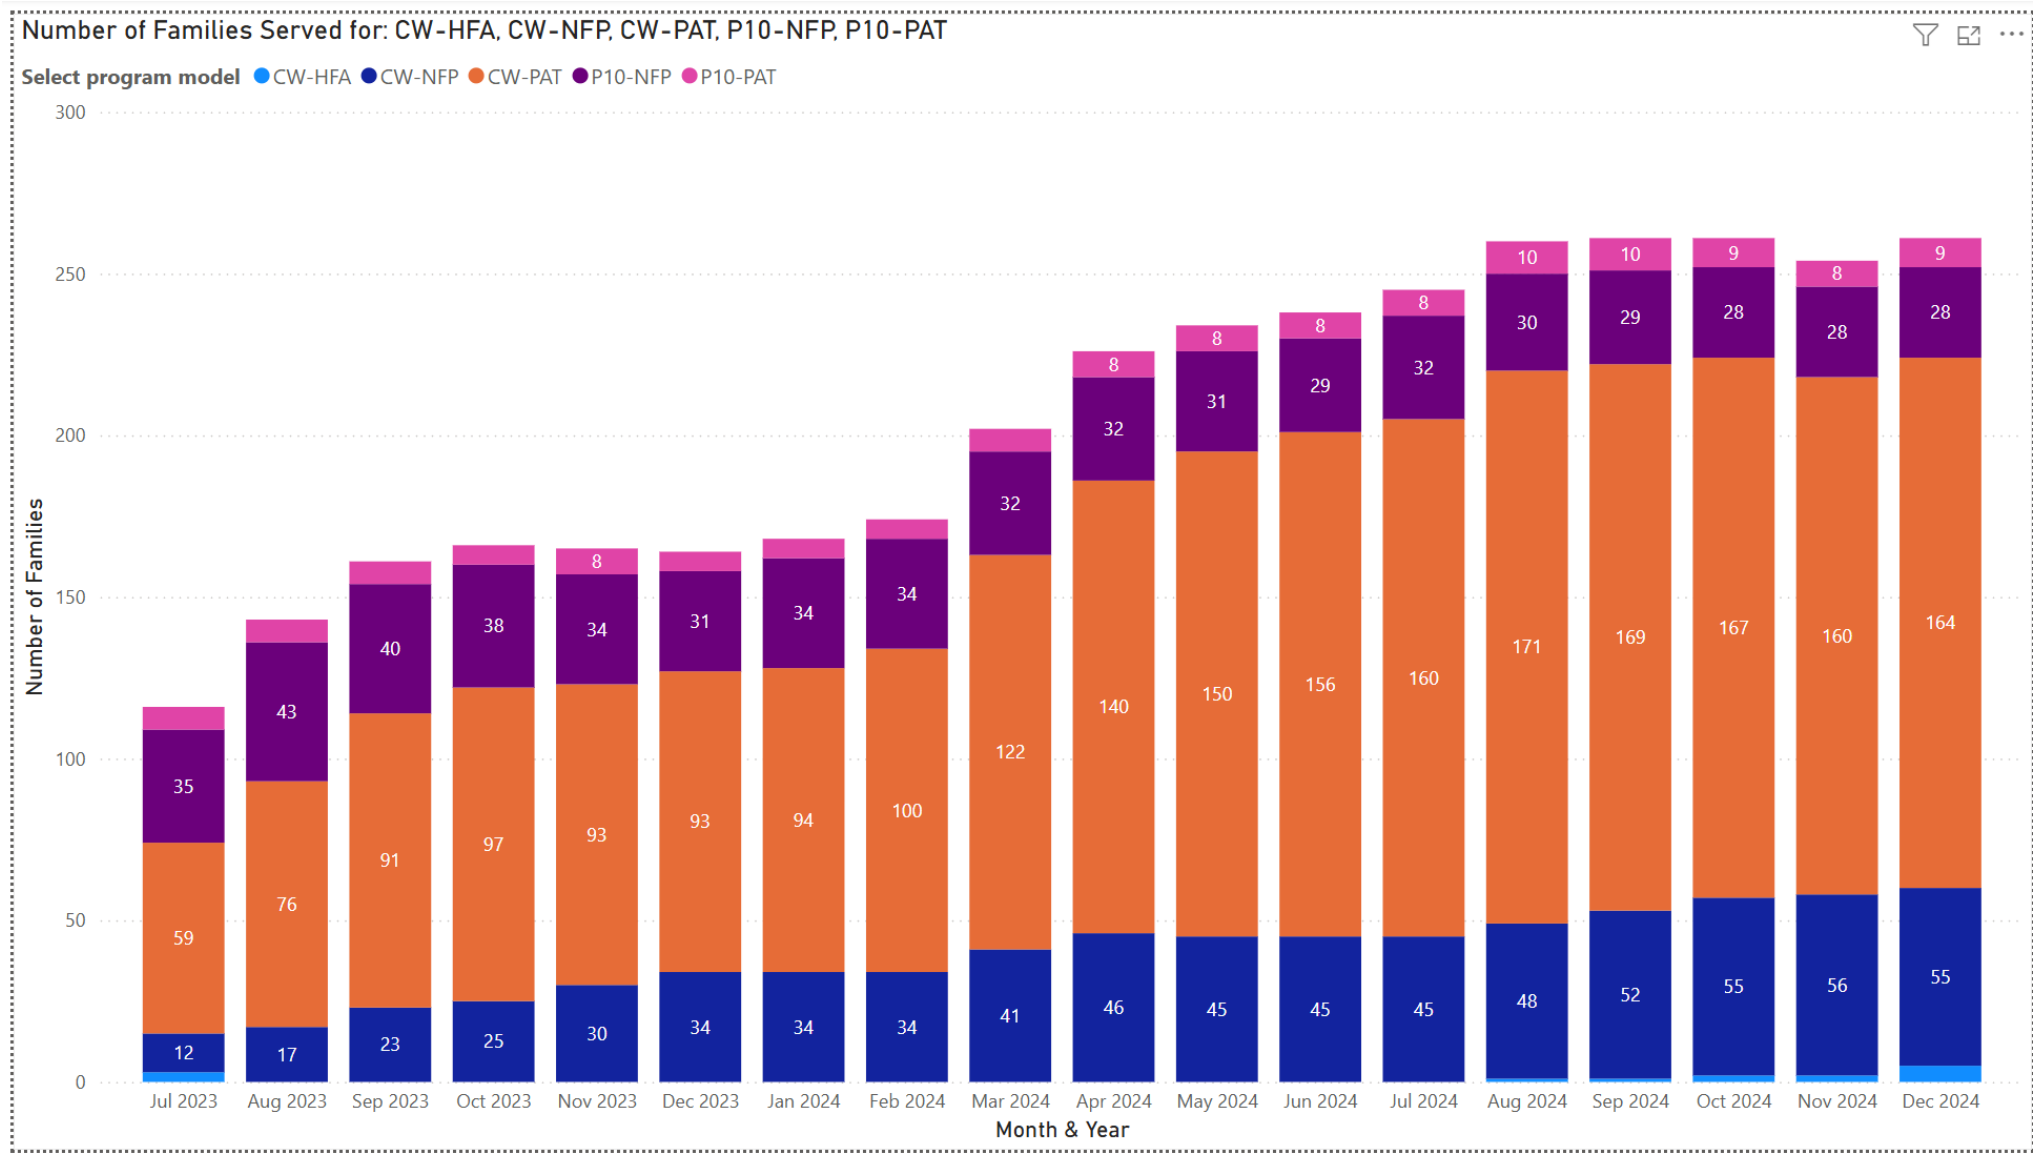

First 5 Programs

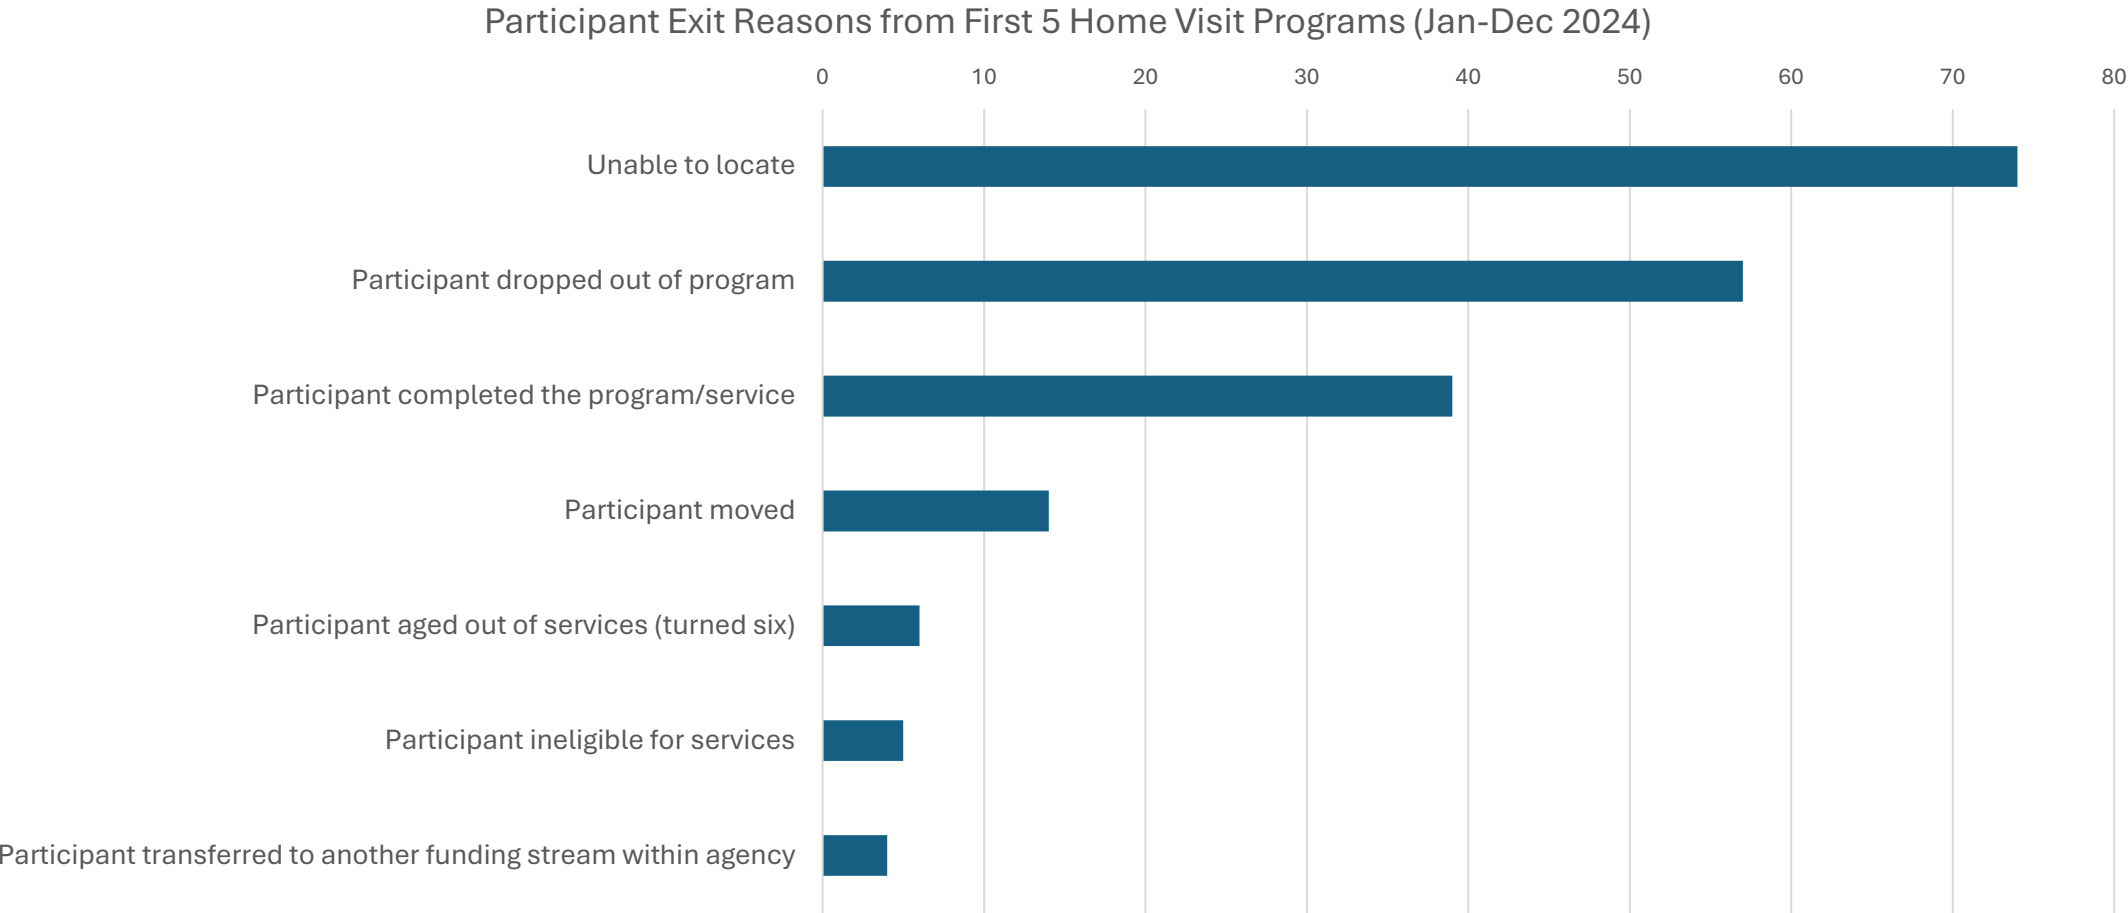

RUHS-PH Nurse Family Partnership Program

Home Visiting: First 5 Reach by Program Model

Home Visits: First 5 Retention

Future Data Source

Coachella Valley Community Health Survey

In 2025, HARC mailed flyers to 25,000 randomly selected Coachella Valley households—continuing its triennial tradition of capturing community health insights.

HARC's Community Health Survey provides baseline data to a community about demographic and socioeconomic characteristics, as well as health status and health risks. This provides background information that helps communities identify issues that need more focused attention. HARC's data is often used to:

- Apply for grant-funding
- Develop needed programs and services
- Develop public policy
- Prioritize needs
