

6-8th Grade Board Report

We had 23 students enrolled for the 6-8th cohort. We averaged about 12-18 students a day. The students voiced that they liked coming to summer school and hanging out with their friends. Partnering with EeKahKiMaht was fun and ran smooth.

We utilized the playgrounds at the other school campuses and the skatepark to get outdoors and exercise. In the classroom, students worked on a collaboration poster, beaded pens/keychains, and researched to compare all the different tribes in montana.

We are excited to round up the last day of summer school at the waterpark in Great Falls, Mt.
