**Technology Report**

We completed our new phone installation and setup. We have some network configurations to make to do away with the old phone settings.

We got the classroom sets of chromebooks out for the Junior High. We had to use backup testing carts from the JH and HS as well as some available for checkout to complete some of them. We will be ordering some more carts and chromebooks shortly to complete these sets.

Mid County Audio completed several projects installing new sound systems and speakers, including the football field, baseball and softball, and the Primary cafeteria.

We continue to work on various work orders throughout the district, most of them dealing with printing issues due to the initial phone setup. We did get several good applicants for our tech support position and hope to fill it shortly.
