

Online updates:

We are continuing to embed EE into our courses through assignments, field trips, experiments, explorations, and our Connection project for 9-12. By using the things we are already doing and enhancing them to showcase the environmental aspects we can help all student become environmentally literate citizens.

Ideas for Earth Day -

- Garbage collection and comparing with seat-based classes? Perhaps a shared digital photo board?
- Virtual field trip meetings
- All school meeting
- Sticker contest

We are still working on this and will work together to come up with a plan to celebrate the big beautiful planet that we share.

We are preparing for OW trip in April. Registration has begun K-5 may go to Long Lake Conservation Center if there is no space at OW. This is a great problem to have and we should have a plan for this by the end of the week.

Seat-based updates:

~Trout eggs came and are starting to hatch!

~Set EE PD for May 1st with Laura Duffy for "Teaching in your School Forest"

~Wolf Ridge Learning Center trip at the end of the month

~Starting to make "packets" to go with ECO time cards
