

### **Professional Development**

Start thinking about before/after school PD to share out to staff; Maybe mid-day; Also TEACH grant at CESA 11;

SLATE: Inviting others NOT on the tech team--HS-Kathryn Dikkers Elem-Bethany Schur ES--Going over iXL with the staff before they start using it; Elizabeth has some webinars to share out how to use this after school

STAR--webinars as well--using in more detail, using reports, and where to go from there; Will be scheduled after school; Elizabeth will reach out. STAR will offer for everyone; ES would prefer before school;

### **Introducing the "SAMR" showcase**

We need to start thinking showing people how to use SAMR--Showing what we are doing on social media. We may have to encourage staff to post;

### **Technology Maintenance**

Paul says we are in good shape. Middle school lab is ready to go with brand new computers and keyboards with all the keys; Computer carts are still in rough shape--but is an ongoing project; We are in the last stages of those carts;

Teacher laptops will be replaced this summer--considering putting the teacher computers on to the carts;

Have the students reset their ipads if charging issues are still having; Have students bring them to Paul with chargers; Ask about what chargers they are using;

### **STAR Testing**

Can do on an iPad; Be considerate of testing on the devices that students are used to; most of our kids don't have experience with a mouse at the young ages.

### **5th Grade iPads**

Deployed 50+ iPads to 5th graders on 10/10; Elizabeth went over expectations for about 45 min;
