

## **BUILDINGS/GROUNDS & TRANSPORTATION REPORT**

**Date:** October 19, 2020  
**To:** Board of Education  
**From:** Jeff Stauder

### **BUILDINGS/GROUNDS**

#### **Facilities Committee**

The committee is supposed to meet on November 4<sup>th</sup> to discuss the high school HVAC project. With the Board approving this at the last meeting, I do not see a need to have a meeting at this time.

#### **Safety Hazard Resolution**

Every year the Board needs to approve a resolution stating that the District is aware of safety hazards such as students crossing highways and railroad track to get to school. This will require Board action.

#### **Fire Panel**

The fire panel will be installed October 21<sup>st</sup>. Due to covid the company could not get all the parts on time, so that is the reason for the delay.

#### **High School Sound System**

I spoke with the company that will be installing the system last week. He informed me that he has got everything ready to go and will be here in the next couple weeks to install it.

#### **Lincoln School Mold**

I had mentioned at a previous meeting that someone thought there was mold in the air conditioning units. I had it tested and the tests came back negative. I have attached the document below.

#### **Life Safety Reviews**

Our annual health life safety inspections will take place on November 4<sup>th</sup>. When I receive the reports and have a chance to review them I will attach them to my Board Report at the next meeting.

# **Transportation**

## **Drivers**

On the 15<sup>th</sup> of October, all the drivers and aides that were quarantine came back and we are now at full staff again.

## **Bus Evacuations**

These are usually completed by now but with so many drivers out the last two weeks we could not get them done. We will be conducting these by the end of the month.
