The purchase of a new school bus

Transportation Department recommends Harlows Bus # 2 without the seatbelts 2027 International Cummins school bus.

- Our fleet is all international, we already stock international parts
- Warranty work (if needed) not far for repairs.
- Parts interchangeable with our fleet (overall body of the bus).
- We already invest in the diagnostic software for International.

Challenges with introducing another manufacture into the fleet:

- Warranty work and parts for other manufacturers can be costly and longer down time.
- The school bus body is not interchangeable with our fleet.

Thank You
WBCSD
