

Quannah ISD

Technology Report

For the January 2019 School Board

Christmas break provided the opportunity to install needed software updates to our network switches and wireless access points. Software updates were also installed on our district servers. Our social media viewers continue to increase year-over-year. Band concerts, end of semester activities and basketball game results are posted to keep the community informed. Thanks to our coaches who make sure the information is kept current. Our district Instagram account has seen a 15% increase in followers in the past 2 weeks as many of the students and parents use that service. On January 17th, Mrs. Sulak and I will be touring schools at Wichita Falls ISD and Burkburnett ISD to learn how those schools utilize technology. We have also activated our TouchPro interactive TV located in the hallway adjacent to the high school auditorium. This TV will display district event information, pictures and over time will include some photos from prior school annuals that students and community members can view. Mrs. Angela Sparkman's class will be in charge of keeping portions of the TV display updated with photos and information.
