Technology Dept.
December 17, 2018

Student Technology

- East and West each have had 150 new laptops replaced and 5 carts rewired for the correct power. The 300 new laptops are currently in use.
- The laptops for the seniors are ready and will be distributed before Christmas break.
- We are now preparing the 240 refurbished desktops to replace half of our labs in the District to take care of Windows 7 ending in 2020. We will need to replace the other half of our labs next year.

Security/Video

- We have started replacing and increasing the video cameras on all the main entrance doors in the District. Our priority is outside entrances, bus drop-offs, hallways, then classrooms.

District Technology

- We had a host server hardware crash that effected 16 virtual servers during a migration. We rebuilt all the servers from offsite backups that took us about two weeks to complete.
- We are asking for permission from the Board to request E-Rate proposals in three areas, internet service, local area network fiber, and wireless access points. This will be in another request.

Work Orders

- Numbers are both Maintenance and Technology

September	October	November
175 New	182 New	Not available because of the rebuild of the server.
172 Resolved	146 Resolved	
154 Incomplete	190 Incomplete
