

District Crisis Plan/Team Update

Background:

I have asked Trish Murphy and Emmie Crement to co-chair this work. They began by looking at all the building safety plans in the district, and creating a draft of a plan that would be common across all buildings. In addition, they drafted a Reunification Plan that can be customized for each building since we were not aware that any building had anything written.

Trish and Emmie attended the school safety conference in April, and made a list of some priority action items including:

- Recommended Safety training
- Behavioral Threat Assessment
- Digital Threat Assessment
- National Incident Management (NIMS)
- Research technology
- Blue Point / School Guard
- Raptor Visitor Management
- Keys/ Fobs

They will meet as with district team on May 30th. At that meeting, they will ask team members to review the draft of our plans as a district group, and to plan for how to review as a building. They understand that some of our work moving forward will align with the implementation of our newly adopted strategic plan.
