

Cameras

| | Approved | Actual | Purchase Options |
|--|-----------------|---------------|--------------------------------|
| 2022 Camera Project 7 In-Car & 18 Body | \$ 112,000.00 | \$ 114,000.00 | \$ 22,800.00 5 yrs/no interest |

In 2022, the Board of Commissioners approved the purchase of 7 in-car and 18 body-worn cameras. The approved purchase amount was \$112,000 and the final cost amounted to \$114,000.

| 2023 Camera Project | Expected Cost | Purchase Options |
|---|----------------------|---|
| 5 In-Car | \$ 57,225.00 | \$ 17,625.00 year 1 \$ 9,900.00 year 2-5 |
| We are requesting to purchase 5 additional in-car cameras to outfit our new vehicles. | | |

5 Year Payment Plan for both 2022 & 2023 Camera Projects Combined

| | | |
|------|---------------|---|
| 2023 | \$ 40,425.00 | There is already \$112,000 budgeted for 2022. If the Board were to approve the 2023 request for 5 additional in-car cameras, the first 3 years of payments would be covered by the initial budgeted amount. Years 2026 and 2027 would need to be budgeted at that time. |
| 2024 | \$ 32,700.00 | |
| 2025 | \$ 32,700.00 | |
| 2026 | \$ 32,700.00 | |
| 2027 | \$ 32,700.00 | |
| | \$ 171,225.00 | |

Motorola made us an addition 5 year payment plan which rolls both the 2022 camera project expenses and the requested 2023 camera project expenses.

Vehicle Outfitting

| | Approved | Actual |
|--------------------------------|-------------------------------|--------|
| 2022 Vehicle Outfitting | \$ 76,172.32 | n/a |
| 6 patrol and 2 admin | (project is not yet complete) | |

| | Expected Cost | (\$72,000 for the actual outfitting) |
|--|---------------------|--------------------------------------|
| 2023 Vehicle Outfitting | \$ 83,615.00 | (11,615.00 for the equipment below) |
| 6 patrol vehicles and the additional equipment listed below: | | |
| 2 MDTs | \$ 3,898.00 | |
| 3 Printers | \$ 855.00 | |
| 3 Routers | \$ 3,300.00 | |
| 1 Used 800mhz radio | \$ 1,095.00 | |
| 3 Computer Mounts | \$ 2,025.00 | |
| 3 DC Vehicle Adapters | \$ 285.00 | |
| 3 6' Cables | \$ 45.00 | |
| 3 Power Supplies | \$ 87.00 | |
| Shipping | \$ 25.00 | |
| Total the above equipment | \$ 11,615.00 | |

Other considerations that we did not include on all the vehicles

| | | |
|---|-----------|------------------|
| Vehicle Markings | \$ | 13,300.00 |
| 14 vehicles | | |
| Tires | \$ | 11,116.00 |
| The vehicles come with summer tires; we need to have all season tires | | |
| Decommisioning of Old Vehicles | \$ | 6,000.00 |
| Total | \$ | 30,416.00 |

We are requesting the following:

| 2023 Vehicle Purchase Requests | |
|--|----------------------|
| 2023 Vehicle Outfitting | \$ 114,031.00 |
| Cameras | \$ 59,225.00 |
| (additional 5 cameras plus additional 2,000 cost from 2022 approved purchases) | |
| Total Requested | \$ 173,256.00 |

ALPENA COUNTY SHERIFF'S OFFICE

Sheriff Erik W. Smith Undersheriff Cash J. Kroll

Phone (989) 354-9830 · Fax (989) 340-1008 · www.alpenasheriff.com

February 3, 2023

To: Courts & Public Safety Committee

From: Erik Smith, Sheriff

Ref: Vehicles & Equipment

As all of you know, the Sheriff's Office is transitioning from county owned high mileage patrol vehicles to an entirely new fleet of leased vehicles. This process started early 2022 with the order of 8 vehicles and subsequently an additional 6 in 2023. This process has been trying at times and were subjected to a supply chain crisis. When we started this project, it was the goal to equip every vehicle the same and install new in-car cameras that were linked to new body cameras. On August 9, 2022, the Alpena County Board of Commissioners approved \$112,000.00 for the purchase of body cameras and 7 in-car cameras. Another \$76,172.32 was approved to outfit the first 8 leased vehicles.

As of now, we have recently received two administration vehicles and outfitted. We anticipate receiving another two vehicles at any time, leaving 4 to be completed. With an additional 6 vehicles on order for later 2023 and to complete this project correctly, we are going to need 5 additional in-car cameras for the remaining 6 vehicles. We are also going to need two MDT's, three in-car printers, 3 routers, 1 radio, and 3 computer mounts.

The cost for 5 in-car cameras and 5 years of data storage is \$57,225.00. The remaining equipment would cost approximately \$15,000. To complete this project and be respective of this year's budget, I'm requesting that we add 5 in-car cameras to our first camera order. If we do this, we can make yearly payments out of the \$112,000 already approved for the next few years and budget for the remaining years that it didn't cover. With the additional equipment purchase, I ask that we be permitted to use a portion of the \$76,172.32 approved outfitting money for those purchases and then use remaining funds towards actual outfitting. Any outfitting costs that we couldn't cover would then be rolled into the existing vehicle lease amount.

Respectfully,
Erik Smith, Sheriff

FIELD RESPONSE APPLICATION

CommandCentral Evidence features a mobile application that allows users to capture video, images, and audio from the field. The application provides advanced camera controls to help users control what is captured. Integrated metadata population and tagging provides immediate access of content in the Digital Evidence Management application. This isolation ensures evidence is not accessible by other apps and ensures an uncompromised chain of custody from the moment of capture.

This application is a capture source for officers, detectives, command staff, supervisors and other law enforcement personnel. The application's user interface exists in the same ecosystem as the Digital Evidence Management tool. The field response application is available on iOS and Android.

RECORDS MANAGEMENT

CommandCentral Evidence's record management capabilities allow users to quickly and easily search video, audio, images, and other digital content. It then stores that data in a central cloud-based location, streamlining access and management across your organization to reduce the complexities of record management. As a result, this solution helps save your personnel valuable time and allows them to focus on critical tasks.

Records Management offers users the following features to benefit management workflows:

- Consolidated Record View – Enter and view incident data, officer narrative, and digital evidence with one user interface, allowing officers to spend more time in the field.
- Task Creation and Assignment – View, create, and assign tasks or projects for the day as part of the Insights Dashboard. This helps build and close cases faster by tracking progress and assigning ownership to activities.
- Unified Search – Find specific information faster by searching across all agency data.
- Master Indexes – Validate data on persons, vehicles, and organizations against the master indexes. For example, agencies can verify that an arrested person, person of interest, or suspect's information is accurate.
- Compliance Verification – Prompt officers for the information they need so you can check reports before submission and save response time.
- Record Quality Control – Keep data clean by identifying, merging, and de-duplicating records automatically.
- Trusted Agency Sharing – Remain in control of your data when you share case information with other agencies.
- Judicial Case Sharing – Share validated evidence items with trusted judicial partners for use in court, with a verifiable chain of custody.
- Crime Predictions in Dashboard – Monitor activity and set threshold alerts to identify and address crime trends.
- Data Insights Reporting – Access critical insight with pre-built reports and dashboards to make data-driven decisions.

DIGITAL EVIDENCE MANAGEMENT

AGENCY PAGE

CommandCentral Evidence provides a dedicated, public-facing webpage for your agency. This customizable page offers a unique URL to serve as the hub for community interaction with access to the tools for the public to connect with your agency.

The agency page shows quick, rotating messages—bulletins (up to five 244-character messages)—to keep the public informed. Your agency will control the order, schedule, and expiration date of these bulletins. The page also integrates an agency's social media feeds to further unify communications.

PUBLIC SUBMISSIONS

With CommandCentral Evidence, the public can submit information online with an easy-to-use interface. There are multiple self-service form options for online submissions, such as anonymous tips, public information requests, and non-emergency submissions. Your agency will decide which of these forms to deploy and how to personalize these forms with built-in form management tools. The public can submit tips using these forms on CityProtect, or via anonymous SMS communication. Together, these submissions help agencies build a more accurate operating picture. TipManager manages these submissions in a central location and saves digital content in CommandCentral Evidence. This streamlines public-provided content with officer-captured evidence in a single repository.

DIGITAL EVIDENCE COLLECTION

CommandCentral Evidence's digital evidence collection features allows your agency to collect case-specific digital media from any source without needing a personal device or physical storage, such as CDs, USBs, or other devices checked into physical evidence stores. Digital files are automatically added and tagged within the application, making access to specific information easy and efficient.

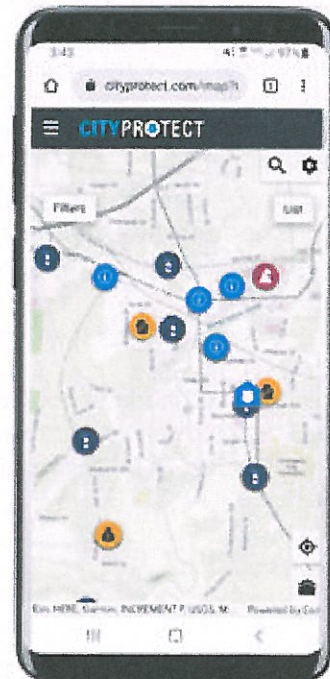

CRIME MAP

Crime Map is built into the CityProtect home page. Crime Map automatically publishes crime data and incident information from your CAD or RMS or CAD system to an interactive, online map. This map keeps the public informed of local crime activity and offers visibility into your operations. Crime Map also provides the following:

- Incident data display with up to hourly updates.
- Primary Agency shapefile.
- Sex offender listing options.
- Crime data download option and action link.

CAMERA REGISTRATION

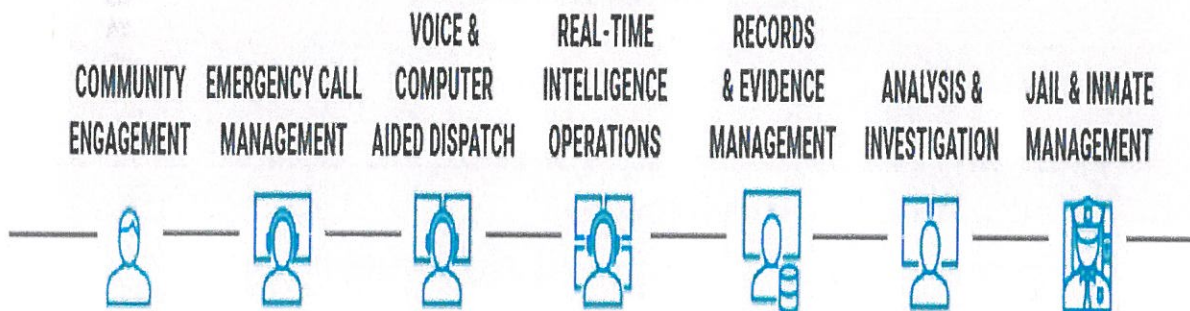

Camera Registration allows citizens to register their residential or commercial security cameras in CityProtect. Each community member can create a free CityProtect user account to manage their camera information. Your agency can then access the location of these cameras and contact the owner for potential video evidence. The data from these accounts is visualized in a variety of CommandCentral applications.

THE COMMANDCENTRAL PLATFORM

CommandCentral is an end-to-end platform of interconnected solutions that unify data and streamline public safety workflows from a tip or call to case closure. Through single sign-on capabilities, your personnel can access all CommandCentral software applications with one agency username and password for a more streamlined workflow. The CommandCentral platform puts your agency's data to better use, improves safety for critical personnel, and helps keep your focus on the communities you serve.

CommandCentral evolves over time, maximizing the value of existing investments while adopting new capabilities that better meet your personnel's growing needs. With cloud-based services and an agile development methodology through constant user feedback, Motorola Solutions can deliver new features and functionality in a more manageable, non-intrusive way.

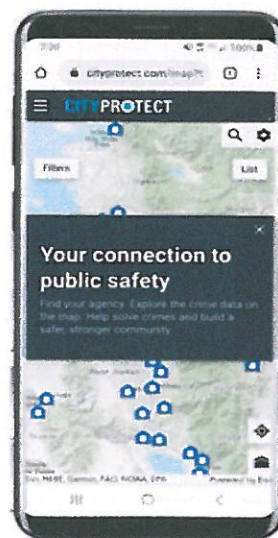

The CommandCentral End-to-End Platform

Community Interaction Tools

CommandCentral Evidence provides a set of Community Interaction tools to enhance the partnership between your agency and the public. This solution is the foundation for transparent community engagement by streamlining the flow of data between your agency and the people you serve. The toolkit helps build public trust and increases the value of community intelligence. As a result, your agency gains new ways to connect with the public, building collaboration and transparency.

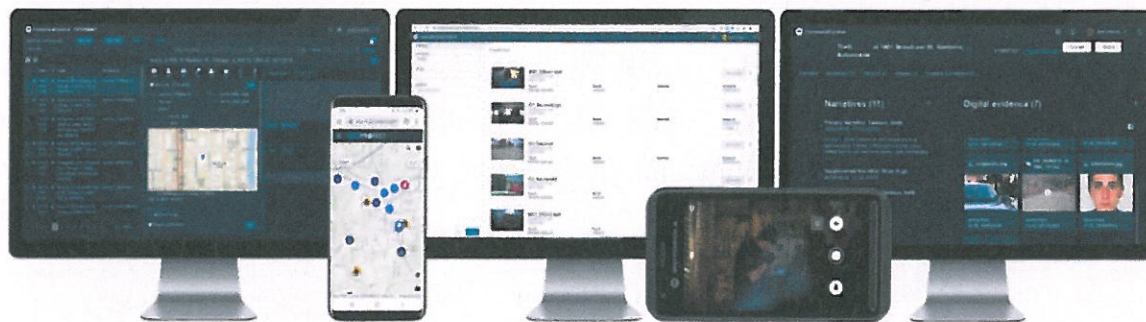

Community interaction centers around CityProtect.com. This mobile-friendly webpage offers citizens a centralized set of tools to contribute to public safety. The tools and forms within CityProtect enable you to create a dialogue with your community and promote the value of citizen intelligence. Sharing and receiving important data is streamlined to make engagement easier.

COMMANDCENTRAL EVIDENCE PLUS SOLUTION DESCRIPTION

OVERVIEW

CommandCentral Evidence provides a suite of digital evidence management tools that help users contain, organize, and act on large amounts of incoming multimedia. These tools streamline the collection, capture, storage, and sharing of data from a single location. By centralizing digital evidence storage and management, CommandCentral Evidence removes data silos and helps users get the most out of their critical information.

Users access all case content from a single, cloud-based location. Cases integrate records and evidence content, allowing users to view all media associated with a case. These cloud-based tools help users account for all evidence regardless of source. CommandCentral Evidence makes it easy to secure and share content with chain of custody intact to improve collaboration.

CommandCentral Evidence is available without any upfront investment. Monthly subscription service costs include the software and video storage. And CommandCentral Evidence uses the Azure GovCloud, securing data at rest and in transit to protect communications. This complies with CJIS guidelines and the NIST framework, audited annually against the Service Organization Control 1 and 2 reporting framework.

Any sales transaction following Motorola's quote is based on and subject to the terms and conditions of the valid and executed written contract between Customer and Motorola (the "Underlying Agreement") that authorizes Customer to purchase equipment and/or services or license software (collectively "Products"). If no Underlying Agreement exists between Motorola and Customer, the Motorola's Standard Terms of Use and Motorola's Standard Terms and Conditions of Sales and Supply shall govern the purchase of the Products.

M500 IN-CAR VIDEO SYSTEM SOLUTION DESCRIPTION

The M500 In-Car Video System is the first AI-enabled in-car video solution for law enforcement. It combines Motorola's powerful camera technology with our industry-leading digital evidence management software (DEMS), to improve the quality of evidence collected and streamline the data sharing process throughout investigation.

VIDEO RECORDING AND CAPTURE

Equipped with high-definition front and cabin cameras with configurable recording resolution of up to 1080p, the M500 creates a reliable record of evidence that can be uploaded to your DEMS solution from any location with a cellular or Wi-Fi signal.

It is equipped with patented Record-After-the-Fact (RATF) technology, which ensures continuous recording from both front and cabin perspectives whenever the camera is on, even if the recording function isn't manually engaged. All RATF data is automatically uploaded to DEMS, for easy review and data capture whenever it is needed.

DISPLAY AND USER INTERFACE

The M500 system features a 5" control panel with a bright, clear display. It offers an icon-driven interface and intuitive controls to streamline field operations. Users can execute any function on the device within three taps of the screen.

AUTOMATIC RECORDING FUNCTIONALITY

Users can program various sensors to activate a new recording. These sensors include emergency lights, sirens, auxiliary inputs, wireless microphones, vehicle speed, and crash detection. When these sensors are triggered, the integrated cameras automatically start recording, allowing officers to capture video evidence without manually activating any cameras.

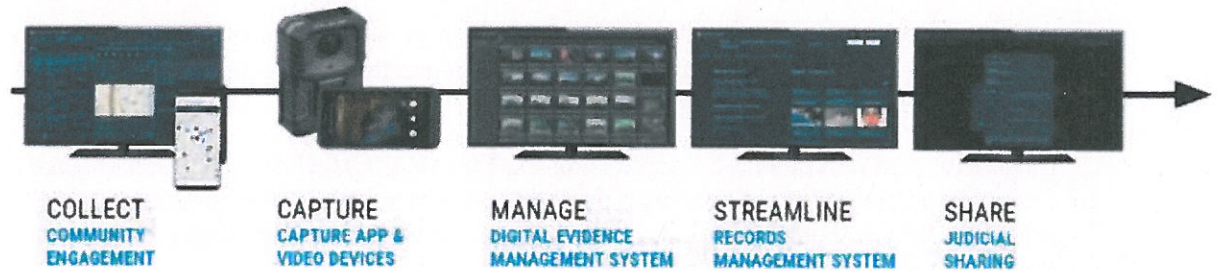

INTEGRATION WITH V300

The M500 integrates with the V300 Body-Worn Camera for synchronized recording and playback, as well as wireless uploading. Whenever one camera in a group is activated, the Group Recording function enables other cameras in that group within Wi-Fi range to join in on a group recording for easy capture of all available information. Video evidence on a V300 Body-Worn Camera can be uploaded to your evidence management system via an in-car LTE network.

VIDEO-AS-A-SERVICE OVERVIEW

Video-as-a-Service (VaaS) is a subscription-based solution that provides agencies with Motorola's industry-leading evidence collection and management tools. VaaS provides agencies access to high-definition camera systems and the industry's only fully end-to-end digital evidence management ecosystem. Included in this quote is access to CommandCentral Evidence, which includes several applications that enable a single, streamlined workflow.

When combined into a single solution, these tools enable officers in the field to easily capture, record, and upload evidence, as well as efficiently manage and share that evidentiary data. Because Video-as-a-Service requires no up-front purchase of equipment or software, it provides a simple way to quickly deploy and begin using a complete camera and evidence management solution for a per-device charge, billed quarterly.

Interceptor 80

On the go, full-page mobile printing
for all your public safety applications

The PrintekMobile I80 series printers are the latest in reliable, compact, and innovative thermal printing. This small, full-page printer, allows officers the ability to conveniently print a variety of documents on the go like eCitations, crash reports, driver exchange reports, and more. The I80 is rated at 11ppm, and is capable of using continuous roll, perforated rolls, or single sheet thermal paper.

The I80 features USB, Bluetooth or Wi-Fi connectivity, and is compatible with Windows, Android, and iOS Bluetooth operating systems to provide your department a wide range of connections. The I80 is a true drop-in replacement and fits most mounting systems available for in-vehicle printing. Compatible USB cables, and in-vehicle power adaptors make this printer the perfect addition to any public safety vehicle whether you are outfitting a new fleet or updating your current one.

Ready to go out of the box, the I80 is simple and easy to set up. Key features of the I80 include:

- Dual serrated tear edges for clean crisp tear off of your documents.
- Large function buttons on top cover.
- Easy and smooth opening door, with auto loading of paper.
- 2ips / 11ppm print speeds.
- Windows, Android, and iOS Bluetooth compatible.
- Small foot print design for efficient mounting options.
- 2-year bumper-to-bumper warranty.

Public Safety

Ambulance / EMS

Printing Specifications

Printing Method: Direct Thermal.
Printing Resolution: 203 dpi (8 dots per mm).
Printing Speed: Up to 2 ips (11 pages per minute).
Printing Width: Up to 8.27 inches or A4 width.

Fonts/Character/Bar Codes

Fonts: Virtually all TruType fonts, from 6 cpi to 22 cpi depending on emulation chosen, plus scaling.

Unicode support for international characters.

Bar Codes: Virtually all 1D and 2D codes supported, depending on emulation chosen. Downloadable firmware, fonts, graphics, and logos.

Connectivity

Standard (ALL units): USB 2.0 PNP to USB Mini.

Wireless Options: Bluetooth 4.2,
Wi-Fi 802.11 b/g/n

Printek Media (use Printek media for best results)

Paper Type: Direct Thermal Roll, Fanfold, and Cut Sheet.

Roll Size: Maximum roll diameter dependent on mounting option used.

Roll widths from A4 to 8.5" (up to 216mm).

Roll Capacity: Dependent on mounting option used. No internal roll storage.

Fanfold Size: Maximum width: 8.5" (216mm), maximum length 11.5" (305mm), total thickness 0.60"

Core Size: 0.75" Recommended (19mm).

Core ID: 0.50" (for most mounting options).

Software

Drivers and Utilities: Drivers for WIN 7, WIN 8, WIN 10. Compatible with Windows Mobile, Android, and iOS Bluetooth. Print utilities and SDK's for all platforms. Native App and Web printing.

Printer Setup via internal web page, access with browser from Windows based laptops, and tablets.

Emulations: Emulates many popular brands and languages including: Zebra CPCL, ZPL, and ESC POS. Firmware can be upgraded as new emulations become available.

Supports direct printing of Postscripts, PDF, PBM, JPG, BMP, SVG, and TIFF files.

Power Management

Battery: Not available.

Power Options: 100-240 VAC wall adapter, or 12-15 VDC in-vehicle power adapter.

Physical Specifications

D x W x H: 10.0" x 2.16" x 1.18" (55 x 255 x 30mm).

Weight: 1.35 lbs. (612g).

Environmental Specifications

Operating Temp: 0° to 122° F (-18° to 50°C).

Storage Temp: -4° to 140°F (-20° to 60°C).

Humidity: 10% to 90% RH (non-condensing)

Operator Controls and Indicators

2 LED indicators for general fault, power indication. Buttons for power and paper feed.

Sensors for paper out, and black mark detection.

Memory Capacity

256 MB Flash, 512 MB DDR2. Standard memory supports large and graphic intensive print jobs.

Durability and Reliability

Durable extruded aluminum case.

MTBF: 10,000 hours in normal use.

Regulatory Approvals

FCC Class B, CE mark, UKCA, E-Mark, and RoHS compliant.

UL listed AC adapters.

Warranty

2-year warranty on the entire printer - case and printhead.

Options and Accessories

- AC wall adapter 100-240 VAC.
- In-vehicle power adapter, 12-15 VDC.
- Data cables: USB 2.0 PNP to USB Mini.
- Media in case quantities.
- Extended express warranties available.
- In-vehicle mounting systems available from companies like: Gamber Johnson, Havis, Lund, Troy, PMT, RAM Mount, and more.

PrintekMobile's comprehensive warranty covers the entire printer!
