# STEM FAQs

## What is a Ripken Foundation STEM Center?

The Ripken Foundation STEM Center is a comprehensive, turnkey program designed to give kids access to STEM learning at youth-serving organizations and schools. All Ripken Foundation STEM Centers are equipped with state-of-the-art STEM products, technology, furniture, age-appropriate/grade level curriculum, and additional resources to facilitate STEM programming.

## How much space is required?

The Ripken Foundation STEM Centers are extremely mobile and require no set space. Many existing STEM Centers use a classroom or some other underutilized space within their building. Other centers store STEM materials in a moveable storage unit to make it easy to transport between different locations.

## What are the requirements for a Ripken Foundation STEM Center?

A Ripken Foundation STEM Center must be located at a youth-serving and/or community-based organization or school serving underserved youth. In addition, we have a few recommendations to ensure success with implementation of the Ripken Foundation STEM program:

- Have a dedicated lead teacher/mentor identified to coordinate the program, curriculum, and additional teachers/mentors.
- Have a dedicated space to store equipment. It is suggested to have a storage solution that includes a locked, controlled space to store computers and other valuable equipment.
- Ripken Foundation STEM Centers are provided with educational products, technology, and furniture. New spaces are not constructed.

## What is the expected lifespan of a Ripken Foundation STEM Center?

The lifespan of the products in a STEM Center is approximately five years. The products included in a Ripken Foundation STEM Center are reusable but work best with some consumable products that the STEM Center organization will need to replenish over time.

## How long does it take to install, train, and launch a Ripken Foundation STEM Center?

The time it takes to install products, train mentors, and launch a Ripken Foundation STEM Center takes 130 to 150 days depending on the availability of products as well as staff time and teacher/mentor trainings.

## What could be included in a STEM Center?

All Ripken Foundation STEM Centers are equipped with supplies and age-appropriate/grade level curriculum that has easy-to-follow introductory STEM lessons that can serve 24 to 28 youth at a time. The items provided allow youth to work in small groups and are listed below and based on grade levels.

*\*Products listed above can be included in a Ripken Foundation STEM Center but are not guaranteed.*

## Can you modify program elements to fit the environment or age group?

We offer Ripken Foundation STEM Centers in the three packages as outlined above. Depending on the organization, changes to products may be made on a case-by-case basis.

## Does the curriculum align with any standards?

The curriculum and lessons align with Next Generation Science Standards (NGSS) and tie into the New Mexico Assessment of Science Readiness (NMASR) and the Texas Essential Knowledge Skills (TEKS) standards for teachers and mentors. Many school districts have charts to show how their local standards align with the NGSS.

## Who oversees the Ripken Foundation STEM program?

Within the organization, a lead teacher/mentor should oversee the program. The teacher/mentor does not have to be a STEM professional. Dedicated youth professionals, including: classroom teachers, aides, librarians, parent liaisons, or other volunteers with varying educational backgrounds can be trained to be a STEM mentor.

## **Does the Ripken Foundation provide program support, and what does that include?**

The Cal Ripken, Sr. Foundation (CRSF) provides ongoing training and support to all STEM Centers to ensure success with the program. Before opening, CRSF and the organization establish a relationship to ensure consistent communication. Then, CRSF hosts a training to properly introduce the products and train teachers/mentors to be successful implementing the program. After the Ripken Foundation STEM Center is open, CRSF checks in periodically to get updates and provide information on additional opportunities.

## **What is the Ripken Foundation National STEM Challenge?**

Every Ripken Foundation STEM Center automatically qualifies to participate in the annual Ripken Foundation STEM Challenge and can choose five to 10 youth to compete. The challenge topic will change annually and will continue to present real-world scenarios that can be solved using STEM concepts. By competing in this event, youth gain valuable life skills they can use outside of STEM activities such as critical thinking, problem solving, teamwork, and communication.

## **What does a Ripken Foundation STEM Center cost? Are there other costs involved?**

The cost of a Pre-K and Ripken Foundation Elementary School STEM Center is \$33,500. The Ripken Foundation Middle School STEM Center is \$38,500. This includes all equipment, training, and ongoing support. Additional costs each year can include replacing batteries, dough, 3D filament, Foundational Fluencies' blocks, markers, and other small classroom items. In total, a Ripken Foundation STEM Center should not have to replace more than \$300 in products each year.

## **Is this considered a charitable contribution?**

Yes! 100% of the cost of a STEM Center is considered a charitable contribution.
