

MEMORANDUM

RE: Room Usage

This memorandum shares information about room usage. The following chart details the room usage planned in each district for the 2025-26 school year. Our first step is to confirm that these spaces are still available for the new school year. As we begin to move forward with enrollment projections, we do anticipate that we will need to open 1-2 additional New Pathways classrooms. Ideally, these classrooms would be in Kaneland and Central so that our students could remain in or close to their home districts. However, we are open to any building that would welcome our students. We are not yet ready to confirm the need for additional space, but knowing the space availability would impact that decision.
