Re: Security Camera Additions

Please submit this purchase request to the BOE for the June 9th meeting.

As part of our ongoing efforts to maintain and improve the security of our district buildings, we are requesting BOE consent for the purchase and installation of additional security cameras and supporting technology to manage and store the associated video. These added building cameras are a continuation of our overall security and technology plan; the number, type, and building location are aligned with identified needs.

The buildings and camera quantities identified in this project implementation are: Boiler House (2), CESC (1), FES (3), Friendship Station (2), GMSN (2), GMSS (1), HES (4), HSS (3), MCS (2), WAS (2), WES (3).

These added building cameras will be incorporated into our previously installed video management software; however an additional video server and adequate storage space will be added to maximize efficiency of the video system without impacting network capacity.

The total cost to add the 25 cameras is \$65,967.

The cost for the server/ network components is \$16,433.

Purchases totaling \$82,400 will be made to Pentegra Systems to implement this phase of our security plan.
