

Bellville School Health Advisory Committee (SHAC) Report

2024-2025

June 2025

1.0 Mission

To ensure that all children, grades K-12, will receive appropriate, sequential health education instruction that accurately reflects the current issues facing the local community, and thus these students.

2.0 Purpose

To act as an advisory group of individuals who collectively provide advice and recommendations to the Bellville ISD School Board related to school health.

3.0 Current Members

Bellville SHAC has been meeting since September 2024.

O’Bryant Intermediate Parent	TBD
Bellville Junior High Parent	Kari Kirkham
Bellville Junior High Parent	TBD
Bellville High School	TBD
Bellville High School	TBD

4.0 2024-2025 Activities

1. Dating Dilemmas

This program is presented to the 8th grade students during the Principles of Human Service and Computer Science classes. It is done through a partnership with the Texas Department of StateHealth Services and Texas Agri-Life Extension office.

This program was presented May 2024

2. NARCAN on Campuses

TEA requires campuses to have NARCAN on campuses. We have had all nurses trained in the administration of the NARCAN shot to help with an opioid overdose.

3. Safety Day

This is a program that is sponsored by the Texas Agri-Life and the Texas DSHS. 3rd grade students attend this program. There are a number of students and topics discussed.

The date for this year's Safety Day was in the last school week of May 2024.

4. Vaping Education

YouTube videos that were shared with the campus principals at the Jr. High and High Schools. The videos were sent to the teacher for the students to watch during flex classes.

5. Internet Safety (Secondary) (Provided by A and M agrilife and Juvenile probation)

Both secondary campuses would like to continue the program in future years.

5.0 SHAC Recommendations

1. The SHAC members are in agreement that the Dating Dilemmas program should be presented to the 8th grade students. The committee also agrees with the district that parents must sign a permission slip in order for students to be allowed to attend the program. (A and M Agrilife)
2. The SHAC members agree that the water safety program should be continued as long as funding is available.
3. The SHAC members agreed that a Vaping Awareness program should be presented to high school and Jr High students during the 25/26 school year.
4. The SHAC members agreed we should have the internet safety presentation on a yearly basis at secondary level with parent presentations after school hours. (A and M Agrilife)
5. SHAC members agreed that Bellville ISD for human sexuality will not make any changes. Bellville ISD is an abstinence only district. BISD for Biology curriculum will only teach genetics as approved in curriculum (Meiosis and Mitosis). At the elementary level (Grade 5) we will continue with body changing (puberty) video by Proctor and Gamble with required parent approval.
6. The committee is still seeking new parent members. HS student has volunteered to serve on committee for the 25/26 school year.
