

**Homedale School District
Transportation and Maintenance**

I have received an estimate on how much it would cost to repair the track. I am not sure how much to spend on the repairs, because we hold maybe two track meets a year.

I am having issues with getting water out at the middle school, and when we do get enough water it is real dirty and it plugs up the filter in about two hours. This causes the heads not to turn. So I have looked into some different sprinklers that will handle the dirt and the run about forty dollars a head, and I need 1000. I looked into drilling a well and they told me there is not enough water for that big of area.
