Re: Coppell Middle School East Athletic Field Lighting, Bleachers and Press Box

As part of the 2017 bond project program (Project #30), the Coppell Middle School East Athletic Field is to receive field lighting, spectator bleachers, and a press box. These additions were approved by the City of Coppell Planning and Zoning in January, 2018, and by the Coppell City Council on February 13, 2018.

SturdiSteel provided the bid with the best value for the bleachers and press box at a total cost of \$98,600.00. While the bleachers will seat significantly less than the ones at Coppell Middle School North (e.g. total seating for 300 versus about 800), the configuration of the seating and press box are essentially the same. The bleachers will be anodized aluminum seats and risers. SturdiSteel is the same company that provided the bleachers and press box at CMS North and is a long standing, very reputable company that works throughout the State of Texas.

Musco Lighting provided pricing for the field lighting at a total turnkey cost of \$316,412. These is state-of-the-art LED lighting that will meet or exceed Coppell's lighting ordinance. The price also includes all electrical infrastructure work. This lighting system is the new standard for our district. The new Coppell Middle School West will have the same system.

The Interlocal Contract purchasing method, as provided in the Texas Education Code 44.031, was used to obtain proposals through TASB Buyboard for both projects to ensure the best pricing and value for the lighting, bleachers, and press box.

The only remaining items for the athletic field renovation will be the construction of the concession stand and restrooms, a score board, and a small sound system. The concession stand will be bid along with the other CMS East addition and renovation projects in order to enjoy maximum economies of scale in the bid process.

The total bid for both projects is \$415,012.00, including the payment and performance bonds.

RECOMMENDATION: That the Coppell ISD Board of Trustees approve SturdiSteel as the contractor to provide the bleachers and press box for a total cost of \$98,600.00, and Musco Lighting as the contractor to provide the field lighting for a total cost of \$316,412.00 at Coppell Middle School East.
