

Board Report for May 12, 2016

Maintenance:

We are working on work orders and completing them as fast as we can. As far as the fiber optic stuff, all we like is running the conduit for the fiber optic. We have been a little busy.

Transportation:

We have received two of the three buses. The other one will be here supposedly next week. Once it gets here, we will put the VanHool up for sale. The other two buses we have been running them like crazy. Have a couple of issues with one TV doesn't work, back up alarm stop working, but they are running strong. We also got the new Suburban and had a problem with the battery, but it is okay and is running good and track has it now. We are swamped with trips this month.
