- OW Trip - 25 students 13 adults. Options for transportation to and from is our biggest obstacle right now

Let me know if you have any ideas or information for transportation or additional student or families interested in attending.

- Long Lake astronomy overnight - 5 kids and some parents attending.

We look forward to an update after this trip is complete.

- Semester 2 goals reminder. If you have a goal for semester 2 don't forget to start tracking data.

- Looking forward - Earth Day options. School-wide event? Bingo again?

We discussed and all school Earth day assembly with a video presentation of the 2 overnight trips (Astronomy and OW), data and information from human encounters and MESS-E, and a game or activity. Karen and Clare will help to put something together and reach out to Sheila as well. Clare, Becky, and Jennifer will collect pictures and information about the overnight trips to share with the school.

- Saltwatch for next year or other options

Notes from October meeting: Option for Action piece moving forward. Keep saltwatch? Add other options? Thoughts on action projects that tie in with Global Temperature change?

Could we just change the saltwatch survey to touch on Global Temperature change.

- Lets have options for citizen science options by April/May to be in place for next school year
- Temperature monitoring
- Look into Climate Generation
- Maybe keep saltwatch as a option

We will look at alternatives that may fit better with the Global Temperature change theme but wait to make that decision until Salt Watch is complete. It has been a process to get things as far as they are and it is going well. We will review this in March.
