

July 28, 2016

The Becker School District is proud to continue its tradition of educational excellence. Today, the Minnesota Department of Education released the MCA test results for reading, math, and science. Becker surpassed the state average in every grade level for every test. Furthermore, most grade levels improved the number of students proficient in comparison to last year. Superintendent Steve Malone said that “I am pleased with the outstanding work of our administrators, teachers, and students as we continue our journey to prepare self-directed learners to thrive in a changing global community.”
