TO: Gilberto Gonzalez, Superintendent

FROM: Ismael Mijares, Deputy Superintendent for Business & Finance

SUBJECT: BUDGET AMENDMENT FOR SPECIAL PROJECTS

DATE: December 2, 2014

This Budget Amendment is to appropriate funds in the *Capital Projects Budget* for the *Fire Alarms* based on the 5-Year Facility Study. The Total Amount Appropriated is \$724,933 based on the attached Estimates provided by Mr. Davis Powell. This includes \$717,755 for the Fire Alarms and \$7,178—1% for Professional Services to Mr. Davis Powell for a Total Amount of \$724,933. This will reduce the *Special Projects Fund Balance* by \$724,933 from \$4,137,822 to \$3,412,889.

Attached are the Budget Amendments to appropriate these funds.

Fire Alarm Report

The Fire Marshal has issued negative reports on the condition of the fire alarms in EPISD schools. His concern is that the systems are antiquated and no longer function properly.

We observed that on nearly every campus, the fire alarm was either not functioning due to signal alarms or simply not working at all. As a result, EPISD must consider fire alarms as a high priority in the 5 year plan.

As part of the repairs and replacements to the fire alarms, consideration should be given to what the district is trying to accomplish with the alarm system. The current Eagle Pass building code is the 2012 IBC which states the following:

[F]907.2.3 Group E.

A manual fire alarm system that initiates the occupant notification signal utilizing an emergency voice/alarm communication system meeting the requirements of <u>Section</u> <u>907.5.2.2</u> and installed in accordance with <u>Section 907.6</u> shall be installed in Group E occupancies. When automatic sprinkler systems or smoke detectors are installed, such systems or detectors shall be connected to the building fire alarm system.

Exceptions:

1. A manual fire alarm system is not required in Group E occupancies with an occupant load of 30 or less.

2. Manual fire alarm boxes are not required in Group E occupancies where all of the following apply:

2.1. Interior corridors are protected by smoke detectors.

2.2. Auditoriums, cafeterias, gymnasiums and similar areas are protected by heat detectors or other approved detection devices.

2.3. Shops and laboratories involving dusts or vapors are protected by heat detectors or other approved detection devices.

3. Manual fire alarm boxes shall not be required in Group E occupancies where the building is equipped throughout with an approved automatic sprinkler system installed in accordance with <u>Section 903.3.1.1</u>, the emergency voice/alarm communication system will activate on sprinkler water flow and manual activation is provided from a normally occupied location.

Based on compliance with the current code, the district should consider 1) should alarms protect life and/or property? 2) Will having manual pull stations be a temptation for student mischief?

Eagle Pass Independent School District Five Year Facility Plan Fire Alarm Report

The least expensive system would be a manual pull station system with a central alarm notification panel. The pull stations shall be located at each exit and every 200' within the building. Each pull station costs approximately \$25.00 for material. An automatic system would require smoke detectors at approximately 30' centers in hallways and main rooms. Each smoke detector costs approximately \$50.00 for material. An automatic system offers the added protection of the property even when the building is not occupied.

Buildings with automatic sprinklers such as CC Winn and EPJH only need to have a single manual pull station and alarm activation with fire sprinkler flow detection.

All types of fire alarms require notification to occupants with a horn and strobe light as required by the American with disabilities Act.

Fire Alarm Recommendations:

- 1. Buildings built prior to 1998 should have fire alarms replaced in compliance with current codes.
- Elementary schools requiring fire alarm replacement shall have automatic smoke detection as allowed in section 907.2.3 Exception 2 of the IBC.
- 3. Memorial Jr High and Eagle Pass High school shall have a manual fire alarm installed per section 907.2.3 of the IBC
- 4. Buildings built after 1998 shall have the existing automatic systems inspected and fixed as required. CC Winn and EPJH have fire sprinkler systems and the alarm may be tied into the flow switch of the sprinkler system if advantageous.
- 5. Portable buildings do not require fire alarm protection and therefore should not be included with the fire alarm systems for their given campus.
- A single source vendor and equipment manufacturer should be hired for all of the alarm work if possible.
- 7. A consultant should be hired to review the condition of the fire alarms of the district on an annual basis.

Re:

Proposal for Architectural Services 5 Year Facility Plan Projects

Dear Mr. Gonzalez,

Thank you for your consideration of our firm to provide services for the 5 Year Facility Plan Projects for the Eagle Pass Independent School District. The following is our proposed Fee schedule and a summary description of the work to be provided as part of these services:

Scope of Service:	Proposed Fee:	Comments:
Request for Proposal (RFP)	1% of contract for construction	As part of our long term relationship with EPISD,
development and Construction		we have provided the RFP documents and
Administration (CA) for FIRE ALARMS		specifications for the district wide fire alarm
		systems. These documents were provided to
		EPISD on 9/25/14. The proposed scope of work is
		for the observation, construction administration,
		and certification of pay applications for the
		project.
RFP development and CA for district	3.5% of contract for construction	Scope of work would include drawings and
wide ROOFING		specfications for each campus, Observation of
		installation, and certification of pay applications.
RFP development and CA for High	6% of contract for construction	Scope of work would include design and
intensity REMODEL Projects		construction administration of complicated
		projects that would require hiring Structural
		Mechanical Electrical and Plumbing Engineering
		consultants. Examples of this type of project
		would be remodeling the Old Jr. High or Austin
		Elementary.
RFP development and CA for Low	3.5% of contract for construction	Scope of work would include the design and
intensity REMODEL projects		construction administration of low intensity
		remodel projects that would not require
		consultant participation. An example of this type
		of project would be the LDC remediation project.
RFP development and CA for NEW	5% of contract for construction	Scope of work would include design and
projects		construction administration of of a new building
		that would require hiring Structural Mechanical
		Electrical and Plumbing Engineering consultants.
		Examples of this type of project would be new
		field houses at the high school campuses.
RFP development for Specialty	Lump sum per job by consultant -	As part of our long term relationship with EPISD,
engineering projects	no mark up by DPA	we will assist EPISD in acquiring engineering
		services for specific projects. An example of this
		type of project includes the LDC drainage
		improvements and EPJH Kilowatt Easement
		Survey.
