

Teaching Strategies GOLD Fall/Winter/Spring Report Region 20 Head Start

The above graph represents the student progress made in each of the nine essential areas of learning and development. This data represents all of our students enrolled in the ESC, Region 20 Head Start Program. The data was collected through the use of our Teaching Strategies Gold System. Students met and exceeded our School Readiness Goals of 90% in the areas of Social Emotional, Physical Gross Motor, Physical Fine Motor, Language, Cognitive, Literacy, and Spanish Literacy.

Students made an average gain of 40 percentage points from the beginning of the year in the areas of Math, and Spanish Language, although the students did not attain the School Readiness Goals in these areas, students made significant gains.

This was the first year in the establishment of the School Readiness Goals and this data will help guide the program in the formulating of the school readiness goals for the upcoming year. It will also guide the staff development/training needed for teachers in Math and Spanish Language.

Overall the data illustrates the progress students have made throughout this school year in preparation for Kindergarten success.
