Upcoming Events

September 16, 2024 - September 19, 2024 76th Annual County Treasurers' Association of Texas Conference Denton, TX

October 15 2024 - October 18 2024 Texas Association of County Auditors Fall Conference 2024 Georgetown, TX

October 30 2024 - November 2 2024 Government Finance Officers Association of Texas (GFOAT) Fall Conference San Marcos, TX

TexPool Advisory Board Members

Patrick Krishock David Landeros
Belinda Weaver Sharon Matthews
Deborah Laudermilk Dina Edgar
Valarie Van Vlack

Overseen by the State of Texas Comptroller of Public Accounts Glenn Hegar

Operated under the supervision of the Texas Treasury Safekeeping Trust Company

Economic and Market Commentary:

Here we go again

September 1, 2024

It should be no surprise when the financial markets get ahead of themselves. And we don't need to be an expert at behavioral economics to know rational investors don't exist. But that doesn't make it any less frustrating when traders get over their skis, adding volatility and detracting from liquidity in the market. Just as they did late last year, markets are betting the Federal Reserve cuts rates faster than policymakers have indicated and, importantly, faster than the data is supporting.

Provoked by the Labor Department's substantial downward revision of jobs added this past year and Chair Jerome Powell's dovish comments at the Federal Reserve's central bank symposium at Jackson Hole, Wyo., the futures market has increased the odds of a 50-basis point cut in September policy-setting meeting. We don't agree, expecting a quarter-point reduction. The air is thinner near the Grand Tetons, but it's the markets that seem to be affected by the altitude.

Case in point is that downgrade of the employment figure. The Dept. said that the economy added 818,000 fewer jobs over the past 12 months through March than it had reported. Because that is the largest downward revision since 2009, investors seem to be treating it as the mark of an imminent recession. But we have always felt the Fed is comfortable with monthly additions of around 150,000 jobs as it describes an economy growing at a

(continued page 6)

**Definition of Weighted Average Maturity and Weighted Average Life

WAM is the mean average of the periods of time remaining until the securities held in TexPool (a) are scheduled to be repaid, (b) would be repaid upon a demand by TexPool, or (c) are scheduled to have their interest rate readjusted to reflect current market rates. Securities with adjustable rates payable upon demand are treated as maturing on the earlier of the two dates set forth in (b) and (c) if their scheduled maturity is 397 days or less; and the later of the two dates set forth in (b) and (c) if their scheduled maturity is more than 397 days. The mean is weighted based on the percentage of the amortized cost of the portfolio invested in each period.

WAL is calculated in the same manner as WAM, but is based solely on the periods of time remaining until the securities held in TexPool (a) are scheduled to be repaid or (b) would be repaid upon a demand by TexPool, without reference to when interest rates of securities within TexPool are scheduled to be readjusted.

reasonable pace. Well, the new average is 174,000—not as "red hot" as before the revision, but with a robustness still indicative of a soft landing.

While monetary policy works with a lag, the Fed likely views the labor market as supporting a soft landing, not a free fall. Powell, for one, doesn't appear to be panicking, saying, "We do not seek or welcome further cooling in labor market conditions," in his address in Jackson Hole. In our minds, it would take an extraordinarily weak August payroll number combined with a large jump in the unemployment rate to shift our expectations from a quarter-point to a half-point cut at the September FOMC meeting. On the flip side, the data would have to be very strong to derail the Fed from easing at all. Inflation prints between now and then also are key, of course. Policymakers will have seen all three major government reports—July PCE and August CPI and PPI—before they meet Sept. 16-18, and the same logic applies.

Unfortunately for cash managers, the more investors infer, the more they interfere. The yield curve has now completely inverted. For those of us who expect at most 75 basis-points of cuts in the fed funds target range (now 5.25-5.5%) by year-end, it's hard to rationalize buying securities offering the corresponding deflated yields.

90-Day Treasury Bill is a short-term debt instrument backed by the national government. These are used to collect immediate cash to meet outstanding obligations.

Any private investor can invest in a Treasury bill. The 90-Day Treasury Bill is a weighted average rate of the weekly auctions of 90-Day Treasury Bills.
