

Curriculum Director Report

April 25,2022

Analytic Vu

I have ordered Analytic Vu. This will put all of our data in one place (MAP, State Test Scores, attendance, progress monitoring, grades. This will allow us to analyze data, and monitor student progress much easier. I am in the process of getting all this set up.

Curriculum Trak

I have ordered Curriculum Trak, and Curriculum Mapping program. This will allow us to track what standards are being taught, and how and when these standards are being taught. This will allow us to have curriculum decisions at grade level, as well as across grade levels. It will also be helpful for new teachers to have, as they can see what has been done in the past.

Testing

We completed testing, minus a few make ups for SAT. I want to thank Mrs. Maxwell as she did a fantastic job organizing all of the materials as well as the testing sessions. This is a huge task, and very time consuming.

The 2021 results are now delayed as ISBE works with the Federal Government on our plan for Science. In 2020, Illinois had to give a new science test to meet Federal requirements, and that didn't happen due to COVID. We took the test in 2021 with the hopes of setting baseline data. Not enough data was collected to do the baseline testing, so they are trying to get the Federal Government to agree to allowing the 2022 test to be the baseline testing.
