

Changes from 21-22 to 22-23 Course Catalogs

Added the new RWHS Mission Statement

Added Ryan Lantz and Marcia Walker in respective staffing areas

7th/8th Grade

-Changed "Physical Education 7" to "Physical Education/Health 7". This will be run as an every-other day class next year. Health was cut to a quarter during this school year, losing some of the curriculum previously taught. The every other day schedule will allow students to be physically active all year and have all of the content for health.

-Changed "Enriched Math 7" to "Honors Math 7" to better align course titles

-Changed "Earth Science 8" to "Physical Science 8" to reflect the change in the Science standards by grade level. Both 8th and 9th grade students will take Physical Science next year as we transition to the new standards by grade level. This is the easiest way for us to do this based on the licensing status of our Science Department staff.

-Removed prerequisite requirement for Honors Language Arts 8

-Updated course description for Gateway to Technology

9-12th Grade

-Updated graduation credits needed by grade level

-Reordered most courses to be in numeric order and highlighted courses that will be offered every other year for ease of registration.

Courses that were dropped by department below were largely based on lower staffing numbers and not being able to provide all courses or a pattern of low enrollment.

Agriculture

All courses will be offered on an every other year basis to ensure the full course offerings are available reducing the number of courses that need to be crashed due to low enrollment

Art:

-Dropped Media Arts 2

Business

- "Retail Management and Entrepreneurship" and "Computer Science and Programming" moved to being offered every other year.

-Dropped "Personal Finance" and "Information Processing"

Family and Consumer Science

- Updated course descriptions for “Family Living”, “Child Psychology”, and “Nutrition.”
- Course name changed from “Adulting 101” to “Flight Paths Capstone” and updated description

Industrial Technology Education

- Dropped Digital Electronics
- Updated description in Intro to Engineering and Design

Social Studies

- Dropped College Psychology due to licensing requirement changes

Other Courses

- Dropped SOAR and Yearbook. They have moved to clubs
