

Prairieview Elementary School
June 2025 Board Report

Goal One – Learning

As we wrap up our spring benchmark assessments, it's time to celebrate the growth our students demonstrated. From the time spent on IXL, to huge gains on MAP, or big growth related to our learner characteristics, our students have much to celebrate this month. Thank you to the teachers for all the positive shoutouts to celebrate this growth, the phone calls home, and celebratory emails to mark this hard work. I'm proud of our Panthers this month!!

Our teachers and MTSS team also held year-end

meetings to ensure students receiving intervention have continued support to begin next year. We also included Lakeview in these conversations for our students transitioning across the parking lot next fall. It's important to take a final look at our data, evaluate our interventions, set a course for next fall, and communicate our plans to be successful with our partners at home. Our interventionists also took advantage of their groupings to partner students across grade levels, presenting another opportunity to collaborate.

Goal Two – Whole Student Development

May is a busy month of Field Trips! These trips require a lot of planning from our teachers and time away from school, but they provide invaluable learning experiences and memories for our students. Our 3rd graders visited the Chicago History Museum, 4th grade visited the Museum of Science and Industry, and the 5th graders enjoyed Naper Settlement. These opportunities are rooted in our competencies and are not just fun trips away from school, but an extension of our learning environment.

A few of our parents are employees at Metra, and they brought their safety initiative to our Panthers. Led by Metra Safety Coordinator Tony Mills, our students got to hear a fun but important message about staying safe around train tracks. (I'm also impressed that so many students could identify the world's fastest animal - not a cheetah, but a Peregrine falcon!) Thanks to Mrs. Vo and Mr. Dabagia for connecting us with this valuable community resource.

Goal Three – Environment

As the “middle child” of our three district schools, Prairieview is primed to help prepare our students for transitions between buildings. Through the collaboration of our Student Experience Coordinator and instructional coaches, our incoming 3rd graders experienced a special transition day this month! Mrs. Sanchez, Mrs. Defors, and Mrs. Gemmell created a memorable day of STEM challenges and a tour of our building and expectations. Thanks to Team 66, we were even able to send them home with some awesome Panther Spirit Wear!

Thanks to TEAM 66 for their support of our staff during Teacher Appreciation Week, our annual Field Day, and 5th grade friendly. All of these events are traditions that make our end of the school year so special for students and staff. Prairieview wouldn't be the same without your hard work to improve our learning environment!!
