

Public Works Bi-Weekly Council Report 5/21/2026 thru 6/3/2026

- The hockey rink has all been put back up and pickleball courts have all been striped. We put 4 courts inside the rink. The nets purchased by the Stewie Smashers (\$6K) have been ordered and will be placed when we receive them.
- Peace Park is complete and is already being used. We added solar caps on the poles, flowers in the center planter and placed the garbage receptacles. We will plant a couple of trees this fall. We will also paint the railing along the ramp when time allows.
- We have been cracking down and issuing illegal dumping violations at our Brush and Compost Disposal Site. This is a continuous problem that happens daily and I would like some discussions on regulations to help control this. My suggestions is going back to having it open only a couple of days a week and have it staffed.
- The pool will open on June 8th.
- The 1st round of durapatching has been completed. We hit the worst areas and will try and get out again in September.
- We had our preconstruction meeting for the 2nd Ave NW extension and they will be in full swing soon.
- The goats are working away in Bear Cave
- A couple of us sat through the MS4 webinar working towards our MS4 permit. This is just the beginning and it sounds like they work with us on completing all phases of the permit which we have up to 3 years before we have to be under full compliance.

Shorter list than normal but the hockey rink ate up quite a bit of time.

Thank you!
Sean Hale
