RE: La Vernia ISD – Bond 2023

DATE: June 18, 2025

SUBJECT: n/a

PR DATE: n/a

CONTRACTOR:

PR COST: \$ 256,122.00

Allegion / Architectural Division 8

Dear Dr. Cone,

A comprehensive study was conducted across the entire campus to evaluate the condition of the door hardware and cores. This effort also included the development of detailed floor plans with corresponding door numbers. The purpose of this proposed request is to improve campus security by replacing all existing cores and rekeying the entire facility to a dedicated, secure key system. Three options were evaluated as part of this study.

❖ Option 1: Proposes rekeying the entire campus (the Primary, Intermediate, Junior High, and High School buildings) and replacing the hardware and cores at the Support Center and Central Office. These two facilities currently have more residential-style locks, which would be upgraded to commercial-grade hardware.

The estimated cost for this option is \$176,498.00 (furnish and install).

A value engineering (VE) option was presented for a credit of <\$5,616.00>. This option deletes the cost of 72 cores located in exterior panic devices. The existing covers need to be reversed to deactivate the locking function, a task to be performed by LVISD staff.

Option 2: This proposal changes the classroom hardware function from an inclusion function to a storeroom function to enhance security. This change applies only to classroom doors; all other doors will retain their current hardware. Provisions are included to repair any affected hardware as needed. This change impacts hardware already purchased under the 2023 bond program currently underway, specifically for the Primary and Intermediate campuses.

The purpose of this proposed change is to enhance campus security by ensuring that classroom doors always remain locked, while access into the rooms would be controlled. Safe egress would still be maintained in accordance with life safety requirements.

To minimize waste and reallocate resources efficiently, the idea is to **repurpose the inclusion-function hardware** (originally purchased for the Primary and Intermediate schools) for use at the **Support Center and Central Office**, where it would still be appropriate. Then, **new storeroom-function hardware** would be purchased for new addition at the Primary and Intermediate campuses, ensuring consistency in hardware function across all instructional spaces. This cost is included in the estimated below.

The estimated cost for this option is \$256,122.00 (furnish and install).

A Value Engineering (VE) option was also presented for a credit of <\$9,150.00>. Like the VE option in Option 1, this credit is based on removing 72 lock cores from exterior panic devices. The locking function would be disabled by reversing the existing covers, a task that LVISD staff can perform. In addition, this VE option assumes that LVISD staff will install the hardware and cores at the Support Center and Central Office.

❖ Option 3: Considered the "Cadillac option." It includes rekeying and upgrading the entire campus; however, instead of using standard storeroom-function hardware, this option proposes installing wireless locks with card access throughout. This would provide a higher level of security and greater flexibility for access control, aligning with more modern, technology-based security systems.

The estimated cost for this option is \$454,081.00 (furnish and install).

A Value Engineering (VE) option was also presented for a credit of <\$9,150>. Like the VE option in Option 2, this credit is based on removing 72 lock cores from exterior panic devices. The locking function would be disabled by reversing the existing covers, a task that LVISD staff can perform. In addition, this VE option assumes that LVISD staff will install the hardware and cores at the Support Center and Central Office.

We are requesting approval to proceed with **Option 2 in the amount of \$ 256,122.00**. If approved, we anticipate complete campus conversion completion targeted by the end of the year 2025.

On a side note, if the new hardware for the new Primary and Intermediate school additions is delayed, we will install the currently available hardware on those doors. Once the new hardware arrives, we will swop it out at no additional cost to the district.

1. TRADE PARTNERS PRICING:

i. Architectural Division 8 Cores/Hardware 256,122.00

2. FUNDING SOURCE:

a. SOFT COST – LVISD: Safety & Security Allowance <256,122.00>

3. PROJECTED CONTINGENCY (After PR Approval):

a. SOFT COST – LVISD: Safety & Security Allowance 3,743,878.00

Based on this analysis, AGCM has no objections to the cost, or the supporting documentation as submitted. If you have any questions or require further information, please let me know.

Sincerely, **AGCM**, Inc.

Catherine Bladden

Catherine Blackler Senior Project Manager

"We do what we say we are going to do, when we say we are going to do it and for the dollar amount we said it could be done"

La Vernia ISD District Wide Re-Key and Classroom Door Function Change (06.11.25 meeting)

Scope of Work

- All pricing will be submitted to LVISD School Board in July board meeting
- LVISD will issue a purchase agreement, upon board approval, around the end of July / beginning of August
- Allegion is handling the keying meeting and key system design with LVISD, and the permanent cores / keys will be shipped directly to LVISD
- Installation to begin upon receipt of new hardware around the beginning of October 2025
- LVISD is expecting us to be done with all scope by end of May 2026
- There are complete floor plans with all door #'s identified for all buildings available in Procore and in PDF form
- There are 2 options for LVISD to select from: 1-Change all classroom doors to storeroom function with either a new lock or lock function conversion kits; 2-Change all classroom doors to wireless Schlage NDEB battery powered access lock
- Swapping out all existing SFIC cores with new Schlage R-Restricted SFIC cores is included in both options
- If swapping parts does not work on any particular lock, the district will provide a new lock to AD8 from their stock and we will turn over the other lock and parts to LVISD for stock
- Scotty Bailey with Allegion will assist and train AD8 techs in lock parts swap out scope if that option is selected
- If Wireless Lock Option is selected, Scotty Bailey with Allegion will program the wireless locks and train LVISD on how to use them
- If AD8 encounters other issues besides lock swap scope at any particular door, AD8 will notify the LVISD Maintenance Director and they will put in a service ticket to LVISD Maintenance techs to address the issues
- All lock swap work will have a 1 year installation warranty from date of completion
- LVISD has a 4 day school schedule, Monday Thursday
- Work can be performed at any time on doors that are not classroom doors
- Classroom door scope can be done on any Friday or any school holiday
- These are the school holidays that occur on Monday Thursday during the school year: November 24 27, December 22 31, January 1, March 9-12, May 25

Quantities for both mechanical and wireless lock options on page 2
