

KAUFMAN ISD - MAINTENANCE REPORT

AUGUST 2026

The Kaufman ISD maintenance team has worked throughout the summer to make improvements to the district.

Here are a few of the projects that the team has been working on this month:

(ABOVE) Our electricians used some hidden wire tricks to illuminate these cool new signs at Kaufman High School. (BELOW) New floors installed at Helen Edwards.

A kitchen remodel was done at the high school. The kitchen was completely cleared, cleaned, repainted and the floor was changed from tile to a special epoxy. Big improvement !!!

The AUX gym restrooms at the high school have also been through a complete renovation this summer. The wall tile was upgraded with a more modern design and the floor tile was replace with epoxy.

Lots and lots of concrete has been poured in the district over the last few weeks. (Above) Crews work behind the junior high and in front of Nash. (Below) A new walkway at Monday, and repairs to the faculty lot.

We are always in the process of upgrading the exterior doors in Kaufman ISD. (4) New exterior doors were added over the summer. Pictured below is the new cargo door at Helen Edwards. All of the doors were replaced in their entirety, including the frames.
