

Policy 5600 – Staff Health

Medical Examinations

Through its overall safety program and various policies pertaining to school personnel, the Board shall promote the safety of employees during working hours and assist them in the maintenance of good health. It shall encourage all its employees to maintain optimum health through the practice of good health habits.

Under the circumstances defined below, the Board may require physical examinations of its employees. Results of such physical examinations shall be maintained in separate medical files and not in the employee's personnel file and may be released only as permitted by law.

Physical Examinations

If the work is of a physically demanding nature, subsequent to a conditional offer of employment and prior to a commencement of work, the District may require an applicant to have a medical examination and to meet any other health requirements that may be imposed by the State. The District may condition an offer of employment on the results of such examination, if all entering employees in the applicable job category are subject to such examination. If approved by personnel services, a 30 day grace period beginning from the date of employment may be allowed for the employee to obtain the required medical examination.

All bus drivers, including full-time, regular part-time, and temporary part-time drivers, shall be required to have a satisfactory medical examination prior to employment.

Contagious or Infectious Diseases

If a staff person has a contagious or infectious disease and has knowledge that a person with compromised or suppressed immunity attends the school, the staff person must notify the building administrator that he or she has a contagious or infectious disease which could be life threatening to an immune compromised person. The building administrator and superintendent or designee must determine, after consultation with and on the advice of public health, if the immune compromised person needs appropriate accommodation to protect their health and safety.

Preston School District #201
Section 5000 - Personnel

An employee with a contagious or infectious disease shall not report to work during the period of time in which the employee is infectious. An employee afflicted with a contagious or infectious disease capable of being readily transmitted in the school setting (i.e. airborne transmission of tuberculosis) shall be encouraged to report the existence of the illness in case there are precautions that must be taken to protect the health of others. The District reserves the right to require a statement from the employee's primary care provider prior to the employee's return to work.

Confidentiality

In all instances, District personnel shall respect the individual's right to privacy and treat any medical diagnosis as confidential information. Any information obtained regarding the medical condition or history of any employee shall be collected and maintained on separate forms and in separate medical files and be treated as confidential information. Only those individuals with a legitimate need to know, such as those persons with a direct responsibility for the care of or for determining workplace accommodation for the staff person, will be provided with necessary medical information.

Supervisors and managers may be informed of the necessary restrictions on the work or duties of the employee and necessary accommodations. First aid and safety personnel may be informed, when appropriate, if the disability might require emergency treatment.
