

School Board Meeting/Workshop:

April 25, 2022

Subject:

Annual Radon Testing

Presenter:

**John Heltunen, Director
Buildings and Grounds**

SUGGESTED SCHOOL BOARD ACTION:

No Board Action required

DESCRIPTION:

Each year, the District conducts Radon testing at some sites within the District with the help of our Health and Safety consultant. The results of the testing are required to be provided to the School Board and the Minnesota Department of Health.

This year's testing was conducted at Hanover Elementary. We do have radon mitigation systems in operation at the building. Test results show that the building did not have Radon levels that would require additional action on the part of the District to mitigate.

Each District site is tested every 5 years.
