Memorandum

To: Chelsea School District Board of Education
From: Michael J. Kapolka, Superintendent
Subject: Revised Recommendation for WSEC Site Work
Date: August 17, 2026

Dear Members of the Board of Education,

I am recommending the approval of the revised site improvements at the Washington Street Education Center (WSEC) campus to support the construction of the Field House facility and future campus development.

The recommended work includes the expansion of parking to the east of the Book Street lot and the installation of two stormwater detention ponds. The detention ponds are necessary to accommodate stormwater management requirements associated with the new Field House, expanded parking areas, and planned future campus improvements, including a future practice field and potential building expansion.

In addition, the project includes utility and infrastructure work necessary to support current and future operations of the site, including earthwork, drainage improvements, water service, electrical service upgrades, exterior building connections, and site accessibility improvements.

Consistent with the District's legal review, the previously proposed sidewalk work has been removed from this recommendation and will be addressed separately in accordance with Board Policy 3301 (Purchasing and Procurement). The remaining site work was reasonably anticipated as part of the Field House project, and Rand Construction, as the District's previously selected design-builder, will complete the work listed below.

The proposed project costs are as follows:	
• Building power flush, faucets, and exterior spigots (Sinking Fund):	\$6,168
• Parking lot expansion and fire lane (Bond Fund):	\$140,143
• Earthwork, stormwater infrastructure, and detention ponds (Sinking Fund):	\$417,774
• Three phase electrical service and panel installation (Bond Funds):	\$7,034
• 10% Construction Contingency:	\$57,112

Total Project Cost: \$628,231

These improvements represent the next phase of development for the WSEC campus and provide the infrastructure necessary to support the Field House project while positioning the site for future growth.
