

General Education Department

September 2026 Board Report

The General Education Team successfully supported our local districts as they launched the 2026–27 school year. Team members were actively engaged across the county, participating in professional learning opportunities, joining district leadership meetings, and facilitating best-practice approaches focused on building strong classroom communities and meaningful student-teacher connections.

This work reflects our continued commitment to partnering with local districts in ways that are responsive to their needs and ultimately strengthen the learning experience for students.

In addition, the ISD instructional leadership teams are working closely together to intentionally de-silo the work of General Education and Special Education. Upcoming collaborative meetings will focus on strengthening alignment, increasing shared ownership, and creating more cohesive systems of support for educators and students across the county.

We are excited about the momentum created through the start of the school year and look forward to continuing to build strong partnerships, aligned practices, and collective responsibility for the success of all learners.
