

Consider Ratifying Acceptance of Jobs and Education for Texans Grant

The Texas Workforce Commission notified the College that it would receive \$293,886 of the Jobs and Education for Texans (JET) 2026-2027 Grant. This grant will be used to purchase state of the art equipment for the College's Welding program. The grant funds will purchase virtual welding simulation equipment that will be used to support foundational skills development and robotic welding systems to provide advanced training aligned with local industry practice.

It is recommended that the Board of Regents ratify the acceptance of this grant award.
