Re: Reflex Math

Reflex Math

Fact: Fluency and providing students with the essential practice to master basic math skills is essential for students to be able to comprehend more advanced math concepts in school. Fact fluency practice helps students develop automaticity of simpler math concepts to help students focus their cognitive effort towards learning new math concepts. Reflex Math provides educators with access to provide students with targeted fact fluency to practice math skills as it relates to current math concepts and past math concepts that relate to grade level learning standards. The program is adaptive and provides an engaging, game-based approach to support student engagement with meaningful practice. The tool provides educators with a detailed reporting dashboard that provides real-time insights and tracks individual student growth.
