Subject: District and Campus Improvement Plans and HB3

MISD Board of Trustees: September 15, 2026

Agenda Item – 9A3

Background Information

Improvement Plans

To improve student performance, the district and each campus continuously review, rate, and revise progress on their improvement plans. Advisory committees at the campus and district levels include teachers, staff, district administrators, parents, business representatives, and community members. Established Board Policy and Texas state statute guide the planning process, and the format includes all components required by the Texas Education Agency.

The District Improvement Plan focuses on four goals, with performance objectives documenting the path to achieving each goal. The goals have evolved to reflect a more student-centered focus. The goals identify how we will implement, monitor, and examine growth in each of four primary ideals: Academics, Culture, Leadership, and Advocacy. Goal 1, Academics, includes the House Bill 3 Early Childhood literacy, math, and College, Career, and Military Readiness goal requirements as well as strategies that pertain to House Bill 4545/HB1416. The MAST committee will work throughout the school year to examine progress toward each goal and recommend continued improvement.

Targeted Support and Improvement

Midway Middle School has been identified under the state's yearly accountability system as a campus for Targeted Support and Improvement (TSI). TEA assigns this designation when a campus has one or more student groups that fail to meet interim targets or expected growth on the same three indicators for three consecutive years, indicating consistent underperformance. As a result, the campus must develop a Local Improvement Plan (LIP) that includes an evidence-based school improvement strategy designed to improve student outcomes and remove the campus from TSI status. The plan must also include: a description of how district and campus leaders will monitor implementation; additional actions the district will take if the plan is not successfully implemented; a description of the reallocation of resources—time, funding, and staffing—needed to carry out the improvement strategy; and specific student performance goals. State guidance requires that LIPs be developed, board-approved, and in the process of implementation by November 20, 2026; however, the Campus Improvement Plan (CIP) may satisfy the LIP requirement provided it meets all guidance criteria. For Midway Middle School, these requirements are embedded in the CIP under Goal 1, Objective 3, Strategies 1–8.

Fiscal implications

Each plan addresses specific fiscal implications.

Administration Recommendation

The administration recommends the Board approve the District and Campus Improvement Plans as well as the Midway Middle School Local Improvement Plan requirements as presented.
