

Board Report 9/14/26

Power is getting installed for scoreboards at the Middle School.

Field goal posts are getting installed.

The storage shed is scheduled to start construction at the Middle School.

We installed a sprinkler timer wire at the middle school field north of the softball fields. We are going to install valves so next water season the whole Middle School will be automated.

We replaced some locks at the Middle School and Elementary to help in the threat of an emergency.

We manipulated a window in each of the science rooms at the High School to open wider for an emergency exit.

Busing is the same, still in need of a sub driver. (special thanks to Karen for helping when needed)

Dan Aberasturi
