### September 2026–District Technology Update

The Chromebooks and accessories have all been distributed to the students at PHS. We also redistributed the Chromebooks at Driftwood and updated and consolidated the stock there. I am still creating a list of students who need to be billed for missing equipment from the 2025-2026 school year. We are still providing Chromebooks to newly enrolled students as well as the new and returning students to SOFA.

We were able to install Remote Management and Monitoring Software (RMM) called NinjaOne. It allows me to access all of our district computers remotely to help with tickets as well as perform maintenance. We now also have the ability to push needed Operating System security updates to all users at once instead of me going around and doing it one computer at a time.

Bonita and I are finishing up our implementation of PowerSchool's SPED program.

We have gotten our Verkada cameras installed, so they now work hand in hand with the multiple vape sensors we have located in the bathrooms and locker rooms.

The QR code badges for the Driftwood students have been implemented successfully. We are, however, still troubleshooting login issues for a handful of students.

I have/had multiple meetings with Synergy to fix issues that the Secretaries, Principals, Community Liaison, and I have been running into. A few issues I'm addressing are Mass Grade Book Sync, Attendance Letters, Synergy Mail, and Period Attendance errors.

I am working on cleaning up users who are no longer with the district on our server, in Google, and in Synergy.

I am also working on adding to our asset list, along with surplus technology we no longer need/support.

### **New Projects**

Synergy Troubleshooting  
NinjaOne Distribution

### **Ongoing Projects**

Clever Badges  
Power School SPED Implementation  
Chromebook Update
