

Prepared by Dr. Jeffrey Alstadt

District Technology Update

Purpose

To provide the Board of Education with an informational update regarding district-wide technology initiatives and system upgrades.

Background and Information

Director of Technology Bryan Venturi presented key technology updates for the 2026–2027 school year, highlighting recent infrastructure enhancements, hardware deployments, and communication system improvements across the district.

Overview

- Director of Technology Bryan Venturi reported on the deployment of new Chromebooks for all fifth-grade and kindergarten students for the 2026–2027 school year.
- The update detailed the installation of new classroom computers across all classrooms at Kimes Elementary, with Centennial Elementary scheduled next on the list.
- The presentation highlighted the district-wide phone system upgrade, noting that a functional telephone has now been successfully installed in every classroom.

Administrative Recommendation
