

Curriculum Director Report
September 18th, 2026

Report Card

The Administrators will get to preview the 2026 Report Card beginning October 1st. It goes public October 28th. We will present the data at the November board meeting. Next month I will go over some of the changes in how our designation is calculated.

Literacy Work

Dr. Lindsey came September 1st and 2nd. She observed and then met with staff. Dr. Lindsey then met with each grade level on September 17th to go over each grade level needs. I am really excited about the work we are doing in Literacy.

Dyslexia Screening

This year we had to screen all K-2 students for dyslexia. We can not give a diagnosis for dyslexia only a doctor can. These tests are different from NWEA MAP and show more students need interventions.

	Students In need of interventions	Total Students	Percentage
K	29	65	44.62%
1st	21	64	32.81%
2nd	19	75	25.33%
Total	69	204	33.82%

We are still trying to understand all of the reports. We cannot serve all these students plus the 3rd through 5th grade with just 1 Reading Title Teacher. Research shows that having more than 3 students at a time for interventions reduces the effectiveness of the interventions. Our Title Math teachers and paraprofessionals are assisting in providing services. In addition classroom teachers are going to have to provide services to some of these students. Students will be receiving fewer minutes of intervention time. We have similar issues at the Jr. High, and this has created extra stress in both buildings. It will be interesting to see what the data shows as we progress throughout the year.
