

Eduphoria

What it is, and how it supports our teachers and students

Presented to the School Board

What Is Eduphoria?

Eduphoria is a web-based software platform built specifically for K-12 schools.

It brings together student assessment data, curriculum and lesson planning, and staff professional growth in one connected system, so teachers and administrators can make informed decisions without juggling separate tools.

2004

Founded in Texas, serving K-12 districts

Used by our district to connect data, planning, and growth for every campus.

What Eduphoria Includes

Three connected modules our staff use every day

Aware

Collects and analyzes assessment data — benchmarks, state tests, and classroom results — so teachers can spot learning gaps quickly.

Forethought

A curriculum and lesson-planning workspace where teachers build, share, and align lessons to district standards.

Strive

Tracks staff professional development, goals, and formal appraisals in one place for teachers and administrators.

Example: Student Testing History

What an Aware assessment profile looks like for one student — name replaced with a placeholder for privacy.

How Staff Use It Day to Day

Building & scoring assessments

Teachers create common assessments and see results the moment students finish.

Teacher Incentive Allotment (TIA)

Assessment data supports TIA measures, helping the district certify educators for the state's incentive pay program.

Tracking student progress

Dashboards flag which students and skills need extra support, by class or campus.

Managing growth & appraisals

Administrators document T-TESS walkthroughs, goals, and formal evaluations in one system.

Why It Matters for Our District

1

One system, not five

Assessment, curriculum, and staff growth data live in a single place instead of scattered spreadsheets and logins.

2

Faster, better decisions

Teachers and campus leaders see student data in real time and can respond while it still matters.

3

Consistency across campuses

Every school plans, assesses, and evaluates staff using the same shared standards and tools.

Bottom line: Eduphoria helps our educators spend less time on paperwork and more time with students.
