

REPORT AND DISCUSSION OF THE RECENT INTRUDER DETECTION AUDIT REPORT FINDING

Report:

The top priority of Jefferson ISD is keeping our students and staff safe every day. An intruder detection audit was recently conducted on a District campus. The audited campus had one finding, which will be discussed at a Safety and Security Meeting. The campus also had a follow up training, held on September 30, 2026 led by the principal, at which the results of the audit were reviewed, the expectations and procedures regarding exterior door safety were explained again, and feedback from the staff and participants was allowed. This information will be submitted, as required. The specific details of this audit have been provided to, and discussed by the Board in executive session, as appropriate.
